

STATEMENT OF ADDITIONAL INFORMATION
HAVERFORD QUALITY GROWTH STOCK FUND
(Ticker Symbol: HAVGX)

a series of THE ADVISORS' INNER CIRCLE FUND

March 1, 2017

Investment Adviser:
HAVERFORD FINANCIAL SERVICES, INC.

This Statement of Additional Information (“SAI”) is not a prospectus. This SAI is intended to provide additional information regarding the activities and operations of The Advisors’ Inner Circle Fund (the “Trust”) and the Haverford Quality Growth Stock Fund (the “Fund”). This SAI is incorporated by reference and should be read in conjunction with the Fund’s prospectus dated March 1, 2017, as it may be amended from time to time (the “Prospectus”). Capitalized terms not defined herein are defined in the Prospectus. The financial statements including the notes thereto and the report of Ernst & Young LLP thereon, as contained in the 2016 Annual Report to Shareholders are incorporated by reference into and deemed to be part of this SAI. A copy of the 2016 Annual Report to Shareholders must accompany the delivery of this SAI. Shareholders may obtain copies of the Prospectus or Annual Report free of charge by writing to the Fund at Haverford Quality Growth Stock Fund, P.O. Box 219009, Kansas City, MO 64121-9009 (Express Mail Address: Haverford Quality Growth Stock Fund, c/o DST Systems, Inc., 430 West 7th Street, Kansas City, MO 64105) or by calling the Fund at 1-866-301-7212.

THE TRUST

General. The Fund is a separate series of the Trust. The Trust is an open-end investment management company established under Massachusetts law as a Massachusetts voluntary association (commonly known as a business trust) under a Declaration of Trust dated July 18, 1991, as amended and restated February 18, 1997 and amended May 15, 2012 (the “Declaration of Trust”). The Declaration of Trust permits the Trust to offer separate series (“funds”) of shares of beneficial interest (“shares”). The Trust reserves the right to create and issue shares of additional funds. Each fund is a separate mutual fund, and each share of each fund represents an equal proportionate interest in that fund. All consideration received by the Trust for shares of any fund and all assets of such fund belong solely to that fund and would be subject to liabilities related thereto. Each fund of the Trust pays its (i) operating expenses, including fees of its service providers, expenses of preparing prospectuses, proxy solicitation material and reports to shareholders, costs of custodial services and registering its shares under federal and state securities laws, pricing and insurance expenses, brokerage costs, interest charges, taxes and organization expenses, and (ii) pro rata share of the fund’s other expenses, including audit and legal expenses. Expenses attributable to a specific fund shall be payable solely out of the assets of that fund. Expenses not attributable to a specific fund are allocated across all of the funds on the basis of relative net assets. The other funds of the Trust are described in one or more separate statements of additional information.

Voting Rights. Each shareholder of record is entitled to one vote for each share held on the record date for the meeting. The Fund will vote separately on matters relating solely to it. As a Massachusetts voluntary association, the Trust is not required, and does not intend, to hold annual meetings of shareholders. Approval of shareholders will be sought, however, for certain changes in the operation of the Trust and for the election of the Board of Trustees of the Trust (each a “Trustee” and together, the “Board”) under certain circumstances. Under the Declaration of Trust, the Trustees have the power to liquidate the Fund without shareholder approval. While the Trustees have no present intention of exercising this power, they may do so if the Fund fails to reach a viable size within a reasonable amount of time or for such other reasons as may be determined by the Board.

In addition, a Trustee may be removed by the remaining Trustees or by shareholders at a special meeting called upon written request of shareholders owning at least 10% of the outstanding shares of the Trust. In the event that such a meeting is requested, the Trust will provide appropriate assistance and information to the shareholders requesting the meeting.

Any series of the Trust created on or after November 11, 1996 may reorganize or merge with one or more other series of the Trust or of another investment company. Any such reorganization or merger shall be pursuant to the terms and conditions specified in an agreement and plan of reorganization authorized and approved by the Trustees and entered into by the relevant series in connection therewith. In addition, such reorganization or merger may be authorized by vote of a majority of the Trustees then in office and, to the extent permitted by applicable law and the Declaration of Trust, without the approval of shareholders of any series.

ADDITIONAL INFORMATION ABOUT INVESTMENT OBJECTIVES AND POLICIES

The Fund’s investment objective and principal investment strategies are described in the Prospectus. The following information supplements, and should be read in conjunction with, the Prospectus. For a description of certain permitted investments discussed below, see “Description of Permitted Investments” in this SAI.

Haverford Quality Growth Stock Fund. The Fund seeks long-term growth of capital. This investment objective is fundamental, and may not be changed without the consent of shareholders. There can be no assurance that the Fund will be able to achieve its investment objective. The Fund is classified as a “diversified” investment company under the Investment Company Act of 1940, as amended (the “1940 Act”).

As its principal investment strategy, the Fund invests primarily in equity securities as described in the Prospectus. Consistent with Rule 35d-1 of the 1940 Act regarding the use of certain mutual fund names, the Fund has adopted a “non-fundamental” policy to invest at least 80% of its net assets, plus the amount of any borrowings for investment purposes, under normal circumstances, in equity securities. This non-fundamental policy may be changed by the Board upon at least 60 days’ written notice to Fund shareholders.

Although the Fund will normally be as fully invested as practicable in equity securities, as secondary investment strategies and consistent with its investment objective, the Fund may to a lesser extent invest in warrants, rights to purchase common stocks, debt securities convertible into common stocks and preferred stocks. A portion of the Fund's assets may also be invested in investment grade fixed income securities, cash and money market securities. Investment grade fixed income securities either are debt securities rated in one of the four highest rating categories ("investment grade") by a nationally recognized statistical rating organization (an "NRSRO") or that the Fund's investment adviser, Haverford Financial Services, Inc. ("HFS" or the "Adviser") determines are of comparable quality. The Fund may also make limited use of equity index futures contracts for liquidity purposes. In order to generate additional income, the Fund may lend securities that it owns as well as invest in repurchase agreements.

DESCRIPTION OF PERMITTED INVESTMENTS

The following are descriptions of the Fund's permitted investments and investment practices and the associated risk factors. The Fund may invest in any of the following instruments or engage in any of the following investment practices unless such investment or activity is inconsistent with or is not permitted by the Fund's stated investment policies, including those stated below.

Equity Securities. Equity securities represent ownership interests in a company and consist of common stocks, preferred stocks, warrants to acquire common stock, and securities convertible into common stock. Investments in equity securities in general are subject to market risks that may cause their prices to fluctuate over time. Fluctuations in the value of equity securities in which the Fund invests will cause the net asset value ("NAV") of the Fund to fluctuate. The Fund purchases equity securities traded in the United States on registered exchanges or the over-the-counter market. Equity securities are described in more detail below:

- **Common Stock.** Common stock represents an equity or ownership interest in an issuer. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds and preferred stock take precedence over the claims of those who own common stock.
- **Preferred Stock.** Preferred stock represents an equity or ownership interest in an issuer that pays dividends at a specified rate and that has precedence over common stock in the payment of dividends. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds take precedence over the claims of those who own preferred and common stock.
- **Warrants.** Warrants are instruments that entitle the holder to buy an equity security at a specific price for a specific period of time. Changes in the value of a warrant do not necessarily correspond to changes in the value of its underlying security. The price of a warrant may be more volatile than the price of its underlying security, and a warrant may offer greater potential for capital appreciation as well as capital loss. Warrants do not entitle a holder to dividends or voting rights with respect to the underlying security and do not represent any rights in the assets of the issuing company. A warrant ceases to have value if it is not exercised prior to its expiration date. These factors can make warrants more speculative than other types of investments.
- **Convertible Securities.** Convertible securities are bonds, debentures, notes, preferred stocks or other securities that may be converted or exchanged (by the holder or by the issuer) into shares of the underlying common stock (or cash or securities of equivalent value) at a stated exchange ratio. A convertible security may also be called for redemption or conversion by the issuer after a particular date and under certain circumstances (including a specified price) established upon issue. If a convertible security held by the Fund is called for redemption or conversion, the Fund could be required to tender it for redemption, convert it into the underlying common stock, or sell it to a third party.

Convertible securities generally have less potential for gain or loss than common stocks. Convertible securities generally provide yields higher than the underlying common stocks, but generally lower than comparable non-convertible securities. Because of this higher yield, convertible securities generally sell at a price above their "conversion value," which is the current market value of the stock to be received upon conversion. The difference between this conversion value and the price of convertible securities will vary over time depending on changes in the value of the underlying common stocks and interest rates. When the underlying common stocks decline in value, convertible securities will tend not to decline to the

same extent because of the interest or dividend payments and the repayment of principal at maturity for certain types of convertible securities. However, securities that are convertible other than at the option of the holder generally do not limit the potential for loss to the same extent as securities convertible at the option of the holder. When the underlying common stocks rise in value, the value of convertible securities may also be expected to increase. At the same time, however, the difference between the market value of convertible securities and their conversion value will narrow, which means that the value of convertible securities will generally not increase to the same extent as the value of the underlying common stocks. Because convertible securities may also be interest-rate sensitive, their value may increase as interest rates fall and decrease as interest rates rise. Convertible securities are also subject to credit risk, and are often lower-quality securities.

- **Small and Medium Capitalization Issuers.** Investing in equity securities of small and medium capitalization companies often involves greater risk than is customarily associated with investments in larger capitalization companies. This increased risk may be due to the greater business risks of smaller size, limited markets and financial resources, narrow product lines and frequent lack of depth of management. The securities of smaller companies are often traded in the over-the-counter market and even if listed on a national securities exchange may not be traded in volumes typical for that exchange. Consequently, the securities of smaller companies are less likely to be liquid, may have limited market stability, and may be subject to more abrupt or erratic market movements than securities of larger, more established growth companies or the market averages in general.

American Depositary Receipts. American Depositary Receipts (“ADRs”), as well as other “hybrid” forms of ADRs, including European Depositary Receipts (“EDRs”) and Global Depositary Receipts (“GDRs”), are certificates evidencing ownership of shares of a foreign issuer. Depositary receipts are securities that evidence ownership interests in a security or a pool of securities that have been deposited with a “depository” and may be sponsored or unsponsored. These certificates are issued by depository banks and generally trade on an established market in the United States or elsewhere. The underlying shares are held in trust by a custodian bank or similar financial institution in the issuer’s home country. The depository bank may not have physical custody of the underlying securities at all times and may charge fees for various services, including forwarding dividends and interest and corporate actions. ADRs are alternatives to directly purchasing the underlying foreign securities in their national markets and currencies. However, ADRs continue to be subject to many of the risks associated with investing directly in foreign securities.

For ADRs, the depository is typically a U.S. financial institution and the underlying securities are issued by a foreign issuer. For other depository receipts, the depository may be a foreign or a U.S. entity, and the underlying securities may have a foreign or a U.S. issuer. Depositary receipts will not necessarily be denominated in the same currency as their underlying securities. Generally, ADRs are issued in registered form, denominated in U.S. dollars, and designed for use in the U.S. securities markets. Other depository receipts, such as GDRs and EDRs, may be issued in bearer form and denominated in other currencies, and are generally designed for use in securities markets outside the U.S. While the two types of depository receipt facilities (unsponsored or sponsored) are similar, there are differences regarding a holder’s rights and obligations and the practices of market participants. A depository may establish an unsponsored facility without participation by (or acquiescence of) the underlying issuer; typically, however, the depository requests a letter of non-objection from the underlying issuer prior to establishing the facility. Holders of unsponsored depository receipts generally bear all the costs of the facility. The depository usually charges fees upon deposit and withdrawal of the underlying securities, the conversion of dividends into U.S. dollars or other currency, the disposition of non-cash distributions, and the performance of other services. The depository of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the underlying issuer or to pass through voting rights to depository receipt holders with respect to the underlying securities.

Sponsored depository receipt facilities are created in generally the same manner as unsponsored facilities, except that sponsored depository receipts are established jointly by a depository and the underlying issuer through a deposit agreement. The deposit agreement sets out the rights and responsibilities of the underlying issuer, the depository, and the depository receipt holders. With sponsored facilities, the underlying issuer typically bears some of the costs of the depository receipts (such as dividend payment fees of the depository), although most sponsored depository receipts agree to distribute notices of shareholders meetings, voting instructions, and other shareholder communications and information to the depository receipt holders at the underlying issuer’s request. The depository of an unsponsored facility frequently is under no obligation to distribute shareholder

communications received from the issuer of the deposited security or to pass through, to the holders of the receipts, voting rights with respect to the deposited securities.

For purposes of the Fund's investment policies, investments in depositary receipts will be deemed to be investments in the underlying securities. Thus, a depositary receipt representing ownership of common stock will be treated as common stock. Depositary receipts do not eliminate all of the risks associated with directly investing in the securities of foreign issuers.

Investments in the securities of foreign issuers may subject the Fund to investment risks that differ in some respects from those related to investments in securities of U.S. issuers. Such risks include future adverse political and economic developments, possible imposition of withholding taxes on income, possible seizure, nationalization or expropriation of foreign deposits, possible establishment of exchange controls or taxation at the source or greater fluctuation in value due to changes in exchange rates. Foreign issuers of securities often engage in business practices different from those of domestic issuers of similar securities, and there may be less information publicly available about foreign issuers. In addition, foreign issuers are, generally speaking, subject to less government supervision and regulation and different accounting treatment than are those in the United States.

Real Estate Investment Trusts. A real estate investment trust ("REIT") is a corporation or business trust (that would otherwise be taxed as a corporation) which meets the definitional requirements of the Internal Revenue Code of 1986, as amended (the "Code"). The Code permits a qualifying REIT to deduct from taxable income the dividends paid, thereby effectively eliminating corporate level federal income tax and making the REIT a pass-through vehicle for federal income tax purposes. To meet the definitional requirements of the Code, a REIT must, among other things: invest substantially all of its assets in interests in real estate (including mortgages and other REITs), cash and government securities; derive most of its income from rents from real property or interest on loans secured by mortgages on real property; and distribute annually 90% or more of its otherwise taxable income to shareholders.

REITs are sometimes informally characterized as Equity REITs and Mortgage REITs. An Equity REIT invests primarily in the fee ownership or leasehold ownership of land and buildings; a Mortgage REIT invests primarily in mortgages on real property, which may secure construction, development or long-term loans.

REITs may be affected by changes in underlying real estate values, which may have an exaggerated effect to the extent that REITs in which the Fund invests may concentrate investments in particular geographic regions or property types. Certain REITs have relatively small market capitalization, which may tend to increase the volatility of the market price of securities issued by such REITs. Additionally, rising interest rates may cause investors in REITs to demand a higher annual yield from future distributions, which may in turn decrease market prices for equity securities issued by REITs. Rising interest rates also generally increase the costs of obtaining financing, which could cause the value of the Fund's investments to decline. During periods of declining interest rates, certain Mortgage REITs may hold mortgages that the mortgagors elect to prepay, which prepayment may diminish the yield on securities issued by such Mortgage REITs. Equity and Mortgage REITs are also subject to heavy cash flow dependency defaults by borrowers and self-liquidation. In addition, Mortgage REITs may be affected by the ability of borrowers to repay when due the debt extended by the REIT and Equity REITs may be affected by the ability of tenants to pay rent. The above factors may adversely affect a borrower's or a lessee's ability to meet its obligations to the REIT. In the event of default by a borrower or lessee, the REIT may experience delays in enforcing its rights as a mortgagee or lessor and may incur substantial costs associated with protecting its investments.

Furthermore, REITs are dependent upon specialized management skills, have limited diversification and are, therefore, subject to risks inherent in operating and financing a limited number of projects. By investing in REITs indirectly through the Fund, a shareholder will bear not only his proportionate share of the expenses of the Fund, but also, indirectly, similar expenses of the REITs. REITs depend generally on their ability to generate cash flow to make distributions to shareholders. In addition, REITs could possibly fail to qualify for tax free pass-through of income under the Code or to maintain their exemptions from registration under the 1940 Act.

Money Market Securities. Money market securities include short-term U.S. government securities; custodial receipts evidencing separately traded interest and principal components of securities issued by the U.S. Treasury; commercial paper rated

in the highest short-term rating category by an NRSRO, such as Standard & Poor's Ratings Service ("S&P") or Moody's Investors Services, Inc. ("Moody's"), or determined by the Adviser to be of comparable quality at the time of purchase; short-term bank obligations (certificates of deposit, time deposits and bankers' acceptances) of U.S. commercial banks with assets of at least \$1 billion as of the end of their most recent fiscal year; and repurchase agreements involving such securities. Each of these money market securities are described below. For a description of ratings, see "Appendix A – Description of Ratings" to this SAI.

U.S. Government Securities. The Fund may invest in U.S. government securities. Securities issued or guaranteed by the U.S. government or its agencies or instrumentalities include U.S. Treasury securities, which are backed by the full faith and credit of the U.S. Treasury and which differ only in their interest rates, maturities, and times of issuance. U.S. Treasury bills have initial maturities of one-year or less; U.S. Treasury notes have initial maturities of one to ten years; and U.S. Treasury bonds generally have initial maturities of greater than ten years. U.S. Treasury notes and bonds typically pay coupon interest semi-annually and repay the principal at maturity. Certain U.S. government securities are issued or guaranteed by agencies or instrumentalities of the U.S. government including, but not limited to, obligations of U.S. government agencies or instrumentalities such as the Federal National Mortgage Association ("Fannie Mae"), the Government National Mortgage Association ("Ginnie Mae"), the Small Business Administration, the Federal Farm Credit Administration, the Federal Home Loan Banks, Banks for Cooperatives (including the Central Bank for Cooperatives), the Federal Land Banks, the Federal Intermediate Credit Banks, the Tennessee Valley Authority, the Export-Import Bank of the United States, the Commodity Credit Corporation, the Federal Financing Bank, the Student Loan Marketing Association, the National Credit Union Administration and the Federal Agricultural Mortgage Corporation ("Farmer Mac").

Some obligations issued or guaranteed by U.S. government agencies and instrumentalities, including, for example, Ginnie Mae pass-through certificates, are supported by the full faith and credit of the U.S. Treasury. Other obligations issued by or guaranteed by federal agencies, such as those securities issued by Fannie Mae, are supported by the discretionary authority of the U.S. government to purchase certain obligations of the federal agency. Additionally, some obligations are issued by or guaranteed by federal agencies, such as those of the Federal Home Loan Banks, which are supported by the right of the issuer to borrow from the U.S. Treasury. While the U.S. government provides financial support to such U.S. government-sponsored federal agencies, no assurance can be given that the U.S. government will always do so, since the U.S. government is not so obligated by law. Guarantees of principal by U.S. government agencies or instrumentalities may be a guarantee of payment at the maturity of the obligation so that in the event of a default prior to maturity there might not be a market and thus no means of realizing on the obligation prior to maturity. Guarantees as to the timely payment of principal and interest do not extend to the value or yield of these securities nor to the value of the Fund's shares.

On September 7, 2008, the U.S. Treasury announced a federal takeover of Fannie Mae and the Federal Home Loan Mortgage Corporation ("Freddie Mac"), placing the two federal instrumentalities in conservatorship. Under the takeover, the U.S. Treasury agreed to acquire \$1 billion of senior preferred stock of each instrumentality and obtained warrants for the purchase of common stock of each instrumentality (the "Senior Preferred Stock Purchase Agreement" or "Agreement"). Under the Agreement, the U.S. Treasury pledged to provide up to \$200 billion per instrumentality as needed, including the contribution of cash capital to the instrumentalities in the event their liabilities exceed their assets. This was intended to ensure that the instrumentalities maintain a positive net worth and meet their financial obligations, preventing mandatory triggering of receivership. On December 24, 2009, the U.S. Treasury announced that it was amending the Agreement to allow the \$200 billion cap on the U.S. Treasury's funding commitment to increase as necessary to accommodate any cumulative reduction in net worth through the end of 2012. The unlimited support the U.S. Treasury extended to the two companies expired at the beginning of 2013 – Fannie Mae's support is now capped at \$125 billion and Freddie Mac has a limit of \$149 billion.

On August 17, 2012, the U.S. Treasury announced that it was again amending the Agreement to terminate the requirement that Fannie Mae and Freddie Mac each pay a 10% annual dividend. Instead, the companies will transfer to the U.S. Treasury on a quarterly basis all profits earned during a quarter that exceed a capital reserve amount of \$3 billion. It is believed that the new amendment puts Fannie Mae and Freddie Mac in a better position to service their debt because the companies no longer have to borrow from the U.S. Treasury to make fixed dividend payments. As part of the new terms, Fannie Mae and Freddie Mac also will be required to reduce their investment portfolios at an annual rate of 15 percent instead of the previous 10 percent, which puts each of them on track to cut their portfolios to a targeted \$250 billion in 2018.

Fannie Mae and Freddie Mac are the subject of several continuing class action lawsuits and investigations by federal regulators over certain accounting, disclosure or corporate governance matters, which (along with any resulting financial restatements) may adversely affect the guaranteeing entities. Importantly, the future of the entities is in serious question as the U.S. government reportedly is considering multiple options, ranging from nationalization, privatization, consolidation, or abolishment of the entities.

U.S. Treasury Obligations. U.S. Treasury obligations consist of direct obligations of the U.S. Treasury, including Treasury bills, notes and bonds, and separately traded interest and principal component parts of such obligations, including those transferable through the Federal book-entry system known as Separate Trading of Registered Interest and Principal of Securities (“STRIPS”). The STRIPS program lets investors hold and trade the individual interest and principal components of eligible Treasury notes and bonds as separate securities. Under the STRIPS program, the principal and interest components are separately issued by the U.S. Treasury at the request of depository financial institutions, which then trade the component parts separately.

Commercial Paper. Commercial paper is the term used to designate unsecured short-term promissory notes issued by corporations and other entities. Maturities on these issues vary from a few to 270 days.

Obligations of Domestic Banks, Foreign Banks and Foreign Branches of U.S. Banks. The Fund may invest in obligations issued by banks and other savings institutions. Investments in bank obligations include obligations of domestic branches of foreign banks and foreign branches of domestic banks. Such investments in domestic branches of foreign banks and foreign branches of domestic banks may involve risks that are different from investments in securities of domestic branches of U.S. banks. These risks may include future unfavorable political and economic developments, possible withholding taxes on interest income, seizure or nationalization of foreign deposits, currency controls, interest limitations, or other governmental restrictions which might affect the payment of principal or interest on the securities held by the Fund. Additionally, these institutions may be subject to less stringent reserve requirements and to different accounting, auditing, reporting and recordkeeping requirements than those applicable to domestic branches of U.S. banks. Bank obligations include the following:

- **Bankers’ Acceptances.** Bankers’ acceptances are bills of exchange or time drafts drawn on and accepted by a commercial bank. Corporations use bankers’ acceptances to finance the shipment and storage of goods and to furnish dollar exchange. Maturities are generally six months or less.
- **Certificates of Deposit.** Certificates of deposit are interest-bearing instruments with a specific maturity. They are issued by banks and savings and loan institutions in exchange for the deposit of funds and normally can be traded in the secondary market prior to maturity. Certificates of deposit with penalties for early withdrawal will be considered illiquid.
- **Time Deposits.** Time deposits are non-negotiable receipts issued by a bank in exchange for the deposit of funds. Like a certificate of deposit, it earns a specified rate of interest over a definite period of time; however, it cannot be traded in the secondary market. Time deposits with a withdrawal penalty or that mature in more than seven days are considered to be illiquid securities.

Repurchase Agreements. The Fund may enter into repurchase agreements with financial institutions. A repurchase agreement is an agreement under which a fund acquires a fixed income security (generally a security issued by the U.S. government or an agency thereof, a banker’s acceptance, or a certificate of deposit) from a commercial bank, broker, or dealer, and simultaneously agrees to resell such security to the seller at an agreed upon price and date (normally, the next business day). Because the security purchased constitutes collateral for the repurchase obligation, a repurchase agreement may be considered a loan that is collateralized by the security purchased. The acquisition of a repurchase agreement may be deemed to be an acquisition of the underlying securities as long as the obligation of the seller to repurchase the securities is collateralized fully. The Fund follows certain procedures designed to minimize the risks inherent in such agreements. These procedures include effecting repurchase transactions only with creditworthy financial institutions whose condition will be continually monitored by the Adviser. The repurchase agreements entered into by the Fund will provide that the underlying collateral at all times shall have a value at least equal to 102% of the resale price stated in the agreement and consist only of securities permissible under Section 101(47)(A)(i)

of the Bankruptcy Code (the Adviser monitors compliance with this requirement). Under all repurchase agreements entered into by the Fund, the custodian or its agent must take possession of the underlying collateral. In the event of a default or bankruptcy by a selling financial institution, the Fund will seek to liquidate such collateral. However, the exercising of the Fund's right to liquidate such collateral could involve certain costs or delays and, to the extent that proceeds from any sale upon a default of the obligation to repurchase were less than the repurchase price, the Fund could suffer a loss. The Fund may enter into "tri-party" repurchase agreements. In "tri-party" repurchase agreements, an unaffiliated third party custodian maintains accounts to hold collateral for the Fund and its counterparties and, therefore, the Fund may be subject to the credit risk of those custodians. It is the current policy of the Fund not to invest in repurchase agreements that do not mature within seven days if any such investment, together with any other illiquid assets held by the Fund, amounts to more than 15% of the Fund's total assets. The investments of the Fund in repurchase agreements, at times, may be substantial when, in the view of the Adviser, liquidity or other considerations so warrant.

Securities of Other Investment Companies. The Fund may invest in shares of other investment companies, to the extent permitted by applicable law and subject to certain restrictions. These investment companies typically incur fees that are separate from those fees incurred directly by the Fund. The Fund's purchase of such investment company securities results in the layering of expenses, such that shareholders would indirectly bear a proportionate share of the operating expenses of such investment companies, including advisory fees, in addition to paying the Fund's expenses. Unless an exception is available, Section 12(d)(1)(A) of the 1940 Act prohibits a fund from (i) acquiring more than 3% of the voting shares of any one investment company, (ii) investing more than 5% of its total assets in any one investment company, and (iii) investing more than 10% of its total assets in all investment companies combined, including its exchange-traded funds ("ETFs") investments.

For hedging or other purposes, the Fund may invest in investment companies that seek to track the composition and/or performance of specific indexes or portions of specific indexes. Certain of these investment companies, known as ETFs, are traded on a securities exchange. The market prices of index-based investments will fluctuate in accordance with changes in the underlying portfolio securities of the investment company and also due to supply and demand of the investment company's shares on the exchange upon which the shares are traded. Index-based investments may not replicate or otherwise match the composition or performance of their specified index due to transaction costs, among other things.

Pursuant to orders issued by the U.S. Securities and Exchange Commission (the "SEC") to each of certain iShares, Market Vectors, Vanguard, ProShares, PowerShares, Guggenheim (formerly, Claymore), Direxion, Wisdom Tree, Rydex, First Trust and SPDR ETFs and procedures approved by the Board, the Fund may invest in these ETFs in excess of the 3% limit described above, provided that the Fund otherwise complies with the conditions of the SEC order, as it may be amended, and any other applicable investment limitations. Neither these ETFs nor their investment advisers make any representations regarding the advisability of investing in the ETFs.

Securities Lending. The Fund may lend portfolio securities to brokers, dealers and other financial organizations that meet capital and other credit requirements or other criteria established by the Board. These loans, if and when made, may not exceed 33 1/3% of the total asset value of the Fund (including the loan collateral). The Fund will not lend portfolio securities to the Adviser or its affiliates unless permissible under the 1940 Act and the rules and promulgations thereunder. Loans of portfolio securities will be fully collateralized by cash, letters of credit or U.S. government securities, and the collateral will be maintained in an amount equal to at least 100% of the current market value of the loaned securities by marking to market daily. Any gain or loss in the market price of the securities loaned that might occur during the term of the loan would be for the account of the Fund.

The Fund may pay a part of the interest earned from the investment of collateral, or other fee, to an unaffiliated third party for acting as the Fund's securities lending agent, but the Fund will bear all of any losses from the investment of collateral.

By lending its securities, the Fund may increase its income by receiving payments from the borrower that reflect the amount of any interest or any dividends payable on the loaned securities as well as by either investing cash collateral received from the borrower in short-term instruments or obtaining a fee from the borrower when U.S. government securities or letters of credit are used as collateral. Investing cash collateral subjects the Fund to market risk. The Fund remains obligated to return all collateral to the borrower under the terms of its securities lending arrangements, even if the value of investments made with the collateral

decline. Accordingly, if the value of a security in which the cash collateral has been invested declines, the loss would be borne by the Fund, and the Fund may be required to liquidate other investments in order to return collateral to the borrower at the end of the loan. The Fund will adhere to the following conditions whenever its portfolio securities are loaned: (i) the Fund must receive at least 100% cash collateral or equivalent securities of the type discussed above from the borrower; (ii) the borrower must increase such collateral whenever the market value of the securities rises above the level of such collateral; (iii) the Fund must be able to terminate the loan on demand; (iv) the Fund must receive reasonable interest on the loan, as well as any dividends, interest or other distributions on the loaned securities and any increase in market value; (v) the Fund may pay only reasonable fees in connection with the loan (which fees may include fees payable to the lending agent, the borrower, the Fund's administrator and the custodian); and (vi) voting rights on the loaned securities may pass to the borrower, provided, however, that if a material event adversely affecting the investment occurs, the Fund must terminate the loan and regain the right to vote the securities. The Board has adopted procedures reasonably designed to ensure that the foregoing criteria will be met. Loan agreements involve certain risks in the event of default or insolvency of the borrower, including possible delays or restrictions upon the Fund's ability to recover the loaned securities or dispose of the collateral for the loan, which could give rise to loss because of adverse market action, expenses and/or delays in connection with the disposition of the underlying securities.

Derivatives

Pursuant to rules adopted under the Commodity Exchange Act ("CEA") by the Commodity Futures Trading Commission ("CFTC"), the Fund must either operate within certain guidelines and restrictions with respect to the Fund's use of futures, options on such futures, commodity options and certain swaps, or the Adviser will be subject to registration with the CFTC as a "commodity pool operator" ("CPO").

Consistent with the CFTC's regulations, the Trust, on behalf of the Fund, has filed a notice of exclusion from the definition of the term CPO under the CEA pursuant to CFTC Rule 4.5 and, therefore, the Fund is not subject to registration or regulation as a CPO under the CEA. As a result, the Fund will be limited in its ability to use futures, options on such futures, commodity options and certain swaps. Complying with the limitations may restrict the Adviser's ability to implement the Fund's investment strategies and may adversely affect the Fund's performance.

Types of Derivatives:

Futures. A futures contract is an agreement between two parties whereby one party agrees to sell and the other party agrees to buy a specified amount of a financial instrument at an agreed upon price and time. The financial instrument underlying the contract may be a stock, stock index, bond, bond index, interest rate, foreign exchange rate or other similar instrument. Agreeing to buy the underlying financial instrument is called buying a futures contract or taking a long position in the contract. Likewise, agreeing to sell the underlying financial instrument is called selling a futures contract or taking a short position in the contract.

Futures contracts are traded in the United States on commodity exchanges or boards of trade (known as "contract markets") approved for such trading and regulated by the CFTC. These contract markets standardize the terms, including the maturity date and underlying financial instrument, of all futures contracts.

Unlike other securities, the parties to a futures contract do not have to pay for or deliver the underlying financial instrument until some future date (the delivery date). Contract markets require both the purchaser and seller to deposit "initial margin" with a futures broker, known as a futures commission merchant or custodian bank, when they enter into the contract. Initial margin deposits are typically equal to a percentage of the contract's value. Initial margin is similar to a performance bond or good faith deposit on a contract and is returned to the depositing party upon termination of the futures contract if all contractual obligations have been satisfied. After they open a futures contract, the parties to the transaction must compare the purchase price of the contract to its daily market value. If the value of the futures contract changes in such a way that a party's position declines, that party must make additional "variation margin" payments so that the margin payment is adequate. On the other hand, the value of the contract may change in such a way that there is excess margin on deposit, possibly entitling the party that has a gain to receive all or a portion of this amount. This process is known as "marking to the market." Variation margin does not represent a

borrowing or loan by a party but is instead a settlement between the party and the futures broker of the amount one party would owe the other if the futures contract terminated. In computing daily NAV, each party marks to market its open futures positions.

Although the terms of a futures contract call for the actual delivery of and payment for the underlying security, in many cases the parties may close the contract early by taking an opposite position in an identical contract. If the sale price upon closing out the contract is less than the original purchase price, the party closing out the contract will realize a loss. If the sale price upon closing out the contract is more than the original purchase price, the party closing out the contract will realize a gain. Conversely, if the purchase price upon closing out the contract is more than the original sale price, the party closing out the contract will realize a loss. If the purchase price upon closing out the contract is less than the original sale price, the party closing out the contract will realize a gain.

The Fund may incur commission expenses when it opens or closes a futures position.

Options. An option is a contract between two parties for the purchase and sale of a financial instrument for a specified price (known as the “strike price” or “exercise price”) at any time during the option period. Unlike a futures contract, an option grants a right (not an obligation) to buy or sell a financial instrument. Generally, a seller of an option can grant a buyer two kinds of rights: a “call” (the right to buy the security) or a “put” (the right to sell the security). Options have various types of underlying instruments, including specific securities, indices of securities prices, foreign currencies, interest rates and futures contracts. Options may be traded on an exchange (exchange-traded options) or may be customized agreements between the parties (over-the-counter or “OTC” options). Like futures, a financial intermediary, known as a clearing corporation, financially backs exchange-traded options. However, OTC options have no such intermediary and are subject to the risk that the counterparty will not fulfill its obligations under the contract. The principal factors affecting the market value of an option include supply and demand, interest rates, the current market value of the underlying instrument relative to the exercise price of the option, the volatility of the underlying instrument, and the time remaining until the option expires.

▪ **Purchasing Put and Call Options**

When the Fund purchases a put option, it buys the right to sell the instrument underlying the option at a fixed strike price. In return for this right, the Fund pays the current market price for the option (known as the “option premium”). The Fund may purchase put options to offset or hedge against a decline in the market value of its securities (“protective puts”) or to benefit from a decline in the price of securities that it does not own. The Fund would ordinarily realize a gain if, during the option period, the value of the underlying securities decreased below the exercise price sufficiently to cover the premium and transaction costs. However, if the price of the underlying instrument does not fall enough to offset the cost of purchasing the option, a put buyer would lose the premium and related transaction costs.

Call options are similar to put options, except that the Fund obtains the right to purchase, rather than sell, the underlying instrument at the option’s strike price. The Fund would normally purchase call options in anticipation of an increase in the market value of securities it owns or wants to buy. The Fund would ordinarily realize a gain if, during the option period, the value of the underlying instrument exceeded the exercise price plus the premium paid and related transaction costs. Otherwise, the Fund would realize either no gain or a loss on the purchase of the call option.

The purchaser of an option may terminate its position by:

- Allowing it to expire and losing its entire premium;
- Exercising the option and either selling (in the case of a put option) or buying (in the case of a call option) the underlying instrument at the strike price; or
- Closing it out in the secondary market at its current price.

▪ **Selling (Writing) Put and Call Options**

When the Fund writes a call option it assumes an obligation to sell specified securities to the holder of the option at a fixed strike price if the option is exercised at any time before the expiration date. Similarly, when the Fund writes a put option it assumes an obligation to purchase specified securities from the option holder at a fixed strike price if the option is exercised at any time before the expiration date. The Fund may terminate its position in an exchange-traded put option before exercise by buying an option identical to the one it has written. Similarly, the Fund may cancel an OTC option by entering into an offsetting transaction with the counterparty to the option.

The Fund could try to hedge against an increase in the value of securities it would like to acquire by writing a put option on those securities. If security prices rise, the Fund would expect the put option to expire and the premium it received to offset the increase in the security's value. If security prices remain the same over time, the Fund would hope to profit by closing out the put option at a lower price. If security prices fall, the Fund may lose an amount of money equal to the difference between the value of the security and the premium it received. Writing covered put options may deprive the Fund of the opportunity to profit from a decrease in the market price of the securities it would like to acquire.

The characteristics of writing call options are similar to those of writing put options, except that call writers expect to profit if prices remain the same or fall. The Fund could try to hedge against a decline in the value of securities it already owns by writing a call option. If the price of that security falls as expected, the Fund would expect the option to expire and the premium it received to offset the decline of the security's value. However, the Fund must be prepared to deliver the underlying instrument in return for the strike price, which may deprive it of the opportunity to profit from an increase in the market price of the securities it holds.

The Fund is permitted to write only "covered" options. At the time of selling a call option, the Fund may cover the option by owning, among other things:

- The underlying security (or securities convertible into the underlying security without additional consideration), index, interest rate, foreign currency or futures contract;
- A call option on the same security or index with the same or lesser exercise price;
- A call option on the same security or index with a greater exercise price, provided that the Fund also segregates cash or liquid securities in an amount equal to the difference between the exercise prices;
- Cash or liquid securities equal to at least the market value of the optioned securities, interest rate, foreign currency or futures contract; or
- In the case of an index, the portfolio of securities that corresponds to the index.

At the time of selling a put option, the Fund may cover the option by, among other things:

- Entering into a short position in the underlying security;
- Purchasing a put option on the same security, index, interest rate, foreign currency or futures contract with the same or greater exercise price;
- Purchasing a put option on the same security, index, interest rate, foreign currency or futures contract with a lesser exercise price and segregating cash or liquid securities in an amount equal to the difference between the exercise prices; or
- Maintaining the entire exercise price in liquid securities.

- **Options on Securities Indices**

Options on securities indices are similar to options on securities, except that the exercise of securities index options requires cash settlement payments and does not involve the actual purchase or sale of securities. In addition, securities index options are designed to reflect price fluctuations in a group of securities or segment of the securities market rather than price fluctuations in a single security.

- **Options on Futures**

An option on a futures contract provides the holder with the right to buy a futures contract (in the case of a call option) or sell a futures contract (in the case of a put option) at a fixed time and price. Upon exercise of the option by the holder, the contract market clearing house establishes a corresponding short position for the writer of the option (in the case of a call option) or a corresponding long position (in the case of a put option). If the option is exercised, the parties will be subject to the futures contracts. In addition, the writer of an option on a futures contract is subject to initial and variation margin requirements on the option position. Options on futures contracts are traded on the same contract market as the underlying futures contract.

The buyer or seller of an option on a futures contract may terminate the option early by purchasing or selling an option of the same series (i.e., the same exercise price and expiration date) as the option previously purchased or sold. The difference between the premiums paid and received represents the trader's profit or loss on the transaction.

The Fund may purchase put and call options on futures contracts instead of selling or buying futures contracts. The Fund may buy a put option on a futures contract for the same reasons it would sell a futures contract. It also may purchase such a put option in order to hedge a long position in the underlying futures contract. The Fund may buy a call option on a futures contract for the same purpose as the actual purchase of a futures contract, such as in anticipation of favorable market conditions.

The Fund may write a call option on a futures contract to hedge against a decline in the prices of the instrument underlying the futures contracts. If the price of the futures contract at expiration were below the exercise price, the Fund would retain the option premium, which would offset, in part, any decline in the value of its portfolio securities.

The writing of a put option on a futures contract is similar to the purchase of the futures contracts, except that, if the market price declines, the Fund would pay more than the market price for the underlying instrument. The premium received on the sale of the put option, less any transaction costs, would reduce the net cost to the Fund.

- **Combined Positions**

The Fund may purchase and write options in combination with each other, or in combination with futures or forward contracts or swap agreements, to adjust the risk and return characteristics of the overall position. For example, the Fund could construct a combined position whose risk and return characteristics are similar to selling a futures contract by purchasing a put option and writing a call option on the same underlying instrument. Alternatively, the Fund could write a call option at one strike price and buy a call option at a lower price to reduce the risk of the written call option in the event of a substantial price increase. Because combined options positions involve multiple trades, they result in higher transaction costs and may be more difficult to open and close out.

Risks of Derivatives:

While transactions in derivatives may reduce certain risks, these transactions themselves entail certain other risks. For example, unanticipated changes in interest rates, securities prices or currency exchange rates may result in a poorer overall performance of the Fund than if it had not entered into any derivatives transactions. Derivatives may magnify the Fund's gains or losses, causing it to make or lose substantially more than it invested.

When used for hedging purposes, increases in the value of the securities the Fund holds or intends to acquire should offset any losses incurred with a derivative. Purchasing derivatives for purposes other than hedging could expose the Fund to greater risks.

Use of derivatives involves transaction costs, which may be significant, and may also increase the amount of taxable income to shareholders.

Correlation of Prices. The Fund's ability to hedge its securities through derivatives depends on the degree to which price movements in the underlying index or instrument correlate with price movements in the relevant securities. In the case of poor correlation, the price of the securities the Fund is hedging may not move in the same amount, or even in the same direction as the hedging instrument. The Adviser will try to minimize this risk by investing in only those contracts whose behavior it expects to correlate with the behavior of the portfolio securities it is trying to hedge. However, if the Adviser's prediction of interest and currency rates, market value, volatility or other economic factors is incorrect, the Fund may lose money, or may not make as much money as it expected.

Derivative prices can diverge from the prices of their underlying instruments, even if the characteristics of the underlying instruments are very similar to the derivative. Listed below are some of the factors that may cause such a divergence:

- Current and anticipated short-term interest rates, changes in volatility of the underlying instrument, and the time remaining until expiration of the contract;
- A difference between the derivatives and securities markets, including different levels of demand, how the instruments are traded, the imposition of daily price fluctuation limits or discontinued trading of an instrument; and
- Differences between the derivatives, such as different margin requirements, different liquidity of such markets and the participation of speculators in such markets.

Derivatives based upon a narrower index of securities, such as those of a particular industry group, may present greater risk than derivatives based on a broad market index. Since narrower indices are made up of a smaller number of securities, they are more susceptible to rapid and extreme price fluctuations because of changes in the value of those securities.

While currency futures and options values are expected to correlate with exchange rates, they may not reflect other factors that affect the value of the investments of the Fund. A currency hedge, for example, should protect a yen-denominated security from a decline in the yen, but will not protect the Fund against a price decline resulting from deterioration in the issuer's creditworthiness. Because the value of the Fund's foreign-denominated investments changes in response to many factors other than exchange rates, it may not be possible to match the amount of currency options and futures to the value of the Fund's investments precisely over time.

Lack of Liquidity. Before a futures contract or option is exercised or expires, the Fund can terminate it only by entering into a closing purchase or sale transaction. Moreover, the Fund may close out a futures contract only on the exchange the contract was initially traded. Although the Fund intends to purchase options and futures only where there appears to be an active market, there is no guarantee that such a liquid market will exist. If there is no secondary market for the contract, or the market is illiquid, the Fund may not be able to close out its position. In an illiquid market, the Fund may:

- Have to sell securities to meet its daily margin requirements at a time when it is disadvantageous to do so;
- Have to purchase or sell the instrument underlying the contract;
- Not be able to hedge its investments; and/or
- Not be able to realize profits or limit its losses.

Derivatives may become illiquid (i.e., difficult to sell at a desired time and price) under a variety of market conditions. For example:

- An exchange may suspend or limit trading in a particular derivative instrument, an entire category of derivatives or all derivatives, which sometimes occurs because of increased market volatility;
- Unusual or unforeseen circumstances may interrupt normal operations of an exchange;
- The facilities of the exchange may not be adequate to handle current trading volume;
- Equipment failures, government intervention, insolvency of a brokerage firm or clearing house or other occurrences may disrupt normal trading activity; or
- Investors may lose interest in a particular derivative or category of derivatives.

Management Risk. Successful use of derivatives by the Fund is subject to the ability of the Adviser to forecast stock market and interest rate trends. If the Adviser incorrectly predicts stock market and interest rate trends, the Fund may lose money by investing in derivatives. For example, if the Fund were to write a call option based on the Adviser's expectation that the price of the underlying security would fall, but the price were to rise instead, the Fund could be required to sell the security upon exercise at a price below the current market price. Similarly, if the Fund were to write a put option based on the Adviser's expectation that the price of the underlying security would rise, but the price were to fall instead, the Fund could be required to purchase the security upon exercise at a price higher than the current market price.

Pricing Risk. At times, market conditions might make it hard to value some investments. For example, if the Fund has valued its securities too high, shareholders may end up paying too much for Fund shares when they buy into the Fund. If the Fund underestimates its price, shareholders may not receive the full market value for their Fund shares when they sell.

Margin. Because of the low margin deposits required upon the opening of a derivative position, such transactions involve an extremely high degree of leverage. Consequently, a relatively small price movement in a derivative may result in an immediate and substantial loss (as well as gain) to the Fund and it may lose more than it originally invested in the derivative.

If the price of a futures contract changes adversely, the Fund may have to sell securities at a time when it is disadvantageous to do so to meet its minimum daily margin requirement. The Fund may lose its margin deposits if a broker-dealer with whom it has an open futures contract or related option becomes insolvent or declares bankruptcy.

Volatility and Leverage. The Fund's use of derivatives may have a leveraging effect. Leverage generally magnifies the effect of any increase or decrease in value of an underlying asset and results in increased volatility, which means the Fund will have the potential for greater gains, as well as the potential for greater losses, than if the Fund does not use derivative instruments that have a leveraging effect. The prices of derivatives are volatile (i.e., they may change rapidly, substantially and unpredictably) and are influenced by a variety of factors, including:

- Actual and anticipated changes in interest rates;
- Fiscal and monetary policies; and
- National and international political events.

Most exchanges limit the amount by which the price of a derivative can change during a single trading day. Daily trading limits establish the maximum amount that the price of a derivative may vary from the settlement price of that derivative at the end of trading on the previous day. Once the price of a derivative reaches that value, the Fund may not trade that derivative at a price beyond that limit. The daily limit governs only price movements during a given day and does not limit potential gains or losses. Derivative prices have occasionally moved to the daily limit for several consecutive trading days, preventing prompt liquidation of the derivative.

Government Regulation. The regulation of derivatives markets in the U.S. is a rapidly changing area of law and is subject to modification by government and judicial action. In particular, the Dodd-Frank Wall Street Reform and Consumer Protection

Act, signed into law in 2010, grants significant new authority to the SEC and the CFTC to impose comprehensive regulations on the over-the-counter and cleared derivatives markets. These regulations include, but are not limited to, mandatory clearing of certain derivatives and requirements relating to disclosure, margin and trade reporting. The new law and regulations may negatively impact the Fund by increasing transaction and/or regulatory compliance costs, limiting the availability of certain derivatives or otherwise adversely affecting the value or performance of the derivatives the Fund trades. In addition, the SEC proposed new derivatives rules in December 2015 that could limit the Fund's use of derivatives, and adversely impact the Fund's ability to achieve its investment objectives. Other potentially adverse regulatory obligations can develop suddenly and without notice.

Illiquid Securities. Illiquid securities are securities that cannot be sold or disposed of in the ordinary course of business (within seven days) at approximately the prices at which they are valued. Because of their illiquid nature, illiquid securities must be priced at fair value as determined in good faith pursuant to procedures approved by the Board. Despite such good faith efforts to determine fair value prices, the Fund's illiquid securities are subject to the risk that the security's fair value price may differ from the actual price which the Fund may ultimately realize upon its sale or disposition. Difficulty in selling illiquid securities may result in a loss or may be costly to the Fund. Under the supervision of the Board, the Adviser determines the liquidity of the Fund's investments. In determining the liquidity of the Fund's investments, the Adviser may consider various factors, including: (1) the frequency and volume of trades and quotations; (2) the number of dealers and prospective purchasers in the marketplace; (3) dealer undertakings to make a market; and (4) the nature of the security and the market in which it trades (including any demand, put or tender features, the mechanics and other requirements for transfer, any letters of credit or other credit enhancement features, any ratings, the number of holders, the method of soliciting offers, the time required to dispose of the security, and the ability to assign or offset the rights and obligations of the security). The Fund will not hold more than 15% of its net assets in illiquid securities.

Restricted Securities. Restricted securities are securities that may not be sold freely to the public absent registration under the U.S. Securities Act of 1933, as amended (the "1933 Act") or an exemption from registration. As consistent with the Fund's investment objective, the Fund may invest in Section 4(a)(2) commercial paper. Section 4(a)(2) commercial paper is issued in reliance on an exemption from registration under Section 4(a)(2) of the 1933 Act and is generally sold to institutional investors who purchase for investment. Any resale of such commercial paper must be in an exempt transaction, usually to an institutional investor through the issuer or investment dealers who make a market in such commercial paper. The Trust believes that Section 4(a)(2) commercial paper is liquid to the extent it meets the criteria established by the Board. The Trust intends to treat such commercial paper as liquid and not subject to the investment limitations applicable to illiquid securities or restricted securities.

Special Risks of Cyber Attacks. As with any entity that conducts business through electronic means in the modern marketplace, the Fund, and its service providers, may be susceptible to operational and information security risks resulting from cyber attacks. Cyber attacks include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized monitoring, release, misuse, loss, destruction or corruption of confidential information, unauthorized access to relevant systems, compromises to networks or devices that the Fund and its service providers use to service the Fund's operations, operational disruption or failures in the physical infrastructure or operating systems that support the Fund and its service providers, or various other forms of cyber security breaches. Cyber attacks affecting the Fund or the Adviser, the Fund's distributor, custodian, or any other of the Fund's intermediaries or service providers may adversely impact the Fund and its shareholders, potentially resulting in, among other things, financial losses or the inability of Fund shareholders to transact business. For instance, cyber attacks may interfere with the processing of shareholder transactions, impact the Fund's ability to calculate its NAV, cause the release of private shareholder information or confidential business information, impede trading, subject the Fund to regulatory fines or financial losses and/or cause reputational damage. The Fund may also incur additional costs for cyber security risk management purposes designed to mitigate or prevent the risk of cyber attacks. Such costs may be ongoing because threats of cyber attacks are constantly evolving as cyber attackers become more sophisticated and their techniques become more complex. Similar types of cyber security risks are also present for issuers of securities in which the Fund may invest, which could result in material adverse consequences for such issuers and may cause the Fund's investments in such companies to lose value. There can be no assurance that the Fund, the Fund's service providers, or the issuers of the securities in which the Fund invests will not suffer losses relating to cyber attacks or other information security breaches in the future.

INVESTMENT LIMITATIONS

Fundamental Policies

In addition to the investment objective of the Fund, the following investment limitations are fundamental, which means that the Fund cannot change them without approval by the vote of a majority of the outstanding shares of the Fund. The phrase “majority of the outstanding shares” means the vote of (i) 67% or more of the Fund’s shares present at a meeting, if more than 50% of the outstanding shares of the Fund are present or represented by proxy; or (ii) more than 50% of the Fund’s outstanding shares, whichever is less.

The Fund may not:

1. Purchase securities of an issuer that would cause the Fund to fail to satisfy the diversification requirement for a diversified management company under the 1940 Act, the rules or regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.
2. Concentrate investments in a particular industry or group of industries, as concentration is defined under the 1940 Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.
3. Borrow money or issue senior securities (as defined under the 1940 Act), except to the extent permitted under the 1940 Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.
4. Make loans, except to the extent permitted under the 1940 Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.
5. Purchase or sell commodities or real estate, except to the extent permitted under the 1940 Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.
6. Underwrite securities issued by other persons, except to the extent permitted under the 1940 Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.

Non-Fundamental Policies

The following limitations are non-fundamental and may be changed by the Board without shareholder approval.

The Fund may not:

1. Purchase securities of any issuer (except securities of other investment companies, securities issued or guaranteed by the U.S. government, its agencies or instrumentalities and repurchase agreements involving such securities) if, as a result, more than 5% of the total assets of the Fund would be invested in the securities of such issuer; or acquire more than 10% of the outstanding voting securities of any one issuer. This restriction applies to 75% of the Fund’s total assets.
2. Purchase any securities which would cause 25% or more of the total assets of the Fund to be invested in the securities of one or more issuers conducting their principal business activities in the same industry, provided that this limitation does not apply to investments in obligations issued or guaranteed by the U.S. government, its agencies or instrumentalities and repurchase agreements involving such securities. For purposes of this limitation, (i) utility companies will be classified according to their services, for example, gas distribution, gas transmission, electric and

telephone will each be considered a separate industry; and (ii) financial service companies will be classified according to the end users of their services, for example, automobile finance, bank finance and diversified finance will each be considered a separate industry.

3. Borrow money in an amount exceeding 33 1/3% of the value of its total assets, provided that, for purposes of this limitation, investment strategies that either obligate the Fund to purchase securities or require the Fund to segregate assets are not considered to be borrowing. Asset coverage of at least 300% is required for all borrowing, except where the Fund has borrowed money for temporary purposes in an amount not exceeding 5% of its total assets.
4. Make loans if, as a result, more than 33 1/3% of its total assets would be lent to other parties, except that the Fund may (i) purchase or hold debt instruments in accordance with its investment objective and policies; (ii) enter into repurchase agreements; and (iii) lend its securities.
5. Purchase or sell real estate, real estate limited partnership interests, physical commodities or commodities contracts except that the Fund may purchase commodities contracts relating to financial instruments, such as financial futures contracts and options on such contracts.
6. Hold illiquid securities in an amount exceeding, in the aggregate, 15% of the Fund's net assets.

Further,

7. Under normal circumstances, the Fund shall invest at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in equity securities. This non-fundamental policy may be changed by the Board upon at least 60 days' notice to Fund shareholders.

Except with respect to Fund policies concerning borrowing, if a percentage restriction is adhered to at the time of an investment, a later increase or decrease in percentage resulting from changes in values or assets will not constitute a violation of such restriction. With respect to the limitation on illiquid securities, in the event that a subsequent change in net assets or other circumstances causes the Fund to exceed its limitation, the Fund will take steps to bring the aggregate amount of illiquid instruments back within the limitations as soon as reasonably practicable. With respect to the limitation on borrowing, in the event that a subsequent change in net assets or other circumstances cause the Fund to exceed its limitation, the Fund will take steps to bring the aggregate amount of borrowing back within the limitations within three days thereafter (not including Sundays and holidays).

THE ADVISER

General. Haverford Financial Services, Inc., a Pennsylvania Corporation located at Three Radnor Corporate Center, Suite 450, Radnor, PA 19087, is a professional investment management firm registered with the SEC under the Investment Advisers Act of 1940, as amended. The Adviser, founded in 2003, is wholly owned by Drexel Morgan & Co. and is an affiliate of The Haverford Trust Company ("Haverford Trust"). Haverford Trust was founded in 1979 and offers investment management, trust and estate services and private banking. As of December 31, 2016, the Adviser had approximately \$286 million in assets under management.

Advisory Agreement with the Trust. The Trust and the Adviser have entered into an investment advisory agreement dated May 28, 2004 (the "Advisory Agreement") with respect to the Fund. Under the Advisory Agreement, the Adviser serves as the investment adviser and makes investment decisions for the Fund and continuously reviews, supervises and administers the investment program of the Fund, subject to the supervision of, and policies established by, the Board.

After the initial two year term, the continuance of the Advisory Agreement must be specifically approved at least annually: (i) by the vote of the Trustees or by a vote of the majority of the outstanding voting securities of the Fund; and (ii) by the vote of a majority of the Trustees who are not parties to the Advisory Agreement or "interested persons" of any party thereto, cast in person at a meeting called for the purpose of voting on such approval. The Advisory Agreement will terminate automatically in

the event of its assignment, and is terminable at any time without penalty by the Trustees or by a majority of the outstanding voting securities of the Fund or, by the Adviser, on not less than 30 days' nor more than 60 days' written notice to the Trust. As used in the Advisory Agreement, the terms "majority of the outstanding voting securities," "interested persons" and "assignment" have the same meaning as such terms in the 1940 Act.

Advisory Fees Paid to the Adviser. For its services under the Advisory Agreement, the Adviser is entitled to a fee, which is calculated daily and paid monthly, at an annual rate of 0.60% of the average daily net assets of the Fund. The Adviser has contractually agreed to reduce fees and reimburse expenses in order to keep the Fund's net operating expenses (excluding interest, taxes, brokerage commissions, acquired fund fees and expenses, and extraordinary expenses (collectively, "excluded expenses")) from exceeding 1.00% of the Fund's average daily net assets until February 28, 2018. This agreement may be terminated: (i) by the Board, for any reason at any time, or (ii) by the Adviser, upon ninety (90) days' prior written notice to the Trust, effective as of the close of business on February 28, 2018. In addition, if at any point total annual Fund operating expenses (not including excluded expenses) are below the expense cap, the Adviser may receive from the Fund the difference between the total annual Fund operating expenses (not including excluded expenses) and the expense cap to recover all or a portion of its prior fee reductions or expense reimbursements made during the preceding three-year period during which this agreement (or any prior agreement) was in place. For the fiscal years ended October 31, 2014, 2015 and 2016, the Fund paid the Adviser the following advisory fees:

Contractual Advisory Fees			Fees Waived by Adviser			Total Fees Paid (After Waivers) to Adviser		
2014	2015	2016	2014	2015	2016	2014	2015	2016
\$880,560	\$1,032,624	\$1,018,561	\$0	\$0	\$0	\$880,560	\$1,032,624	\$1,018,561

THE PORTFOLIO MANAGERS

This section includes information about the Fund's portfolio managers, including information about other accounts they manage, the dollar range of Fund shares they own and how they are compensated.

Compensation. Haverford Trust compensates the Fund's portfolio managers for their management of the Fund. The portfolio managers' compensation consists of a salary and bonus. The portfolio managers' overall compensation is designed to be competitive with similar investment advisers and to compensate the portfolio managers for their contributions to the Adviser and its investment products. Compensation is not based upon Fund or account performance, but is based on quantitative and qualitative factors. These may include the Adviser's and its affiliates' profitability, investment ideas, teamwork, leadership and overall contributions.

Fund Shares Owned by Portfolio Managers. The following table shows the dollar amount range of each portfolio manager's "beneficial ownership" of shares of the Fund as of the end of the most recently completed fiscal year. Dollar amount ranges disclosed are established by the SEC. "Beneficial ownership" is determined in accordance with Rule 16a-1(a)(2) under the Securities Exchange Act of 1934, as amended (the "1934 Act").

Name	Dollar Range of Fund Shares Owned ¹
Joseph J. McLaughlin, Jr.	\$100,001 - \$500,000
Binney H.C. Wietlisbach	\$100,001 - \$500,000
Henry B. Smith	\$100,001 - \$500,000
John H. Donaldson	\$100,001 - \$500,000
Timothy A. Hoyle	\$10,001 - \$50,000

¹ Valuation date is October 31, 2016.

Other Accounts. In addition to the Fund, certain portfolio managers may also be responsible for the day-to-day management of certain other accounts, as indicated by the following table. None of these accounts are subject to a performance-based advisory fee. The information below is provided as of October 31, 2016.

Name	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)
Joseph J. McLaughlin, Jr.	0	\$0	0	\$0	158	\$538.8
Binney H.C. Wietlisbach	0	\$0	0	\$0	313	\$655.8
Henry B. Smith	0	\$0	0	\$0	24	\$134.8
John H. Donaldson	0	\$0	0	\$0	1	\$32.0
Timothy A. Hoyle	0	\$0	4	\$36.7	3	\$122.9

Conflicts of Interest. The portfolio managers' management of "other accounts" may give rise to potential conflicts of interest in connection with their management of the Fund's investments, on the one hand, and the investments of the other accounts, on the other. The other accounts may have the same investment objective as the Fund. Therefore, a potential conflict of interest may arise as a result of the identical investment objectives, whereby a portfolio manager could favor one account over another. Another potential conflict could include the portfolio managers' knowledge about the size, timing and possible market impact of Fund trades, whereby a portfolio manager could use this information to the advantage of other accounts and to the disadvantage of the Fund. However, the Adviser has established policies and procedures to ensure that the purchase and sale of securities among all accounts it manages are fairly and equitably allocated.

THE ADMINISTRATOR

General. SEI Investments Global Funds Services (the "Administrator"), a Delaware statutory trust, has its principal business offices at One Freedom Valley Drive, Oaks, Pennsylvania 19456. SEI Investments Management Corporation ("SIMC"), a wholly-owned subsidiary of SEI Investments Company ("SEI Investments"), is the owner of all beneficial interest in the Administrator. SEI Investments and its subsidiaries and affiliates, including the Administrator, are leading providers of fund evaluation services, trust accounting systems, and brokerage and information services to financial institutions, institutional investors, and money managers. The Administrator and its affiliates also serve as administrator or sub-administrator to other mutual funds.

Administration Agreement with the Trust. The Trust and the Administrator have entered into an administration agreement dated November 14, 1991, as amended and restated November 12, 2002 (the "Administration Agreement"). Under the Administration Agreement, the Administrator provides the Trust with administrative services, including regulatory reporting and all necessary office space, equipment, personnel and facilities.

The Administration Agreement provides that the Administrator shall not be liable for any error of judgment or mistake of law or for any loss suffered by the Trust in connection with the matters to which the Administration Agreement relates, except a loss resulting from willful misfeasance, bad faith or gross negligence on the part of the Administrator in the performance of its duties or from reckless disregard by it of its duties and obligations thereunder.

Administration Fees Paid to the Administrator. For its services under the Administration Agreement, the Administrator is paid a fee, which varies based on the average daily net assets of the Fund, subject to certain minimums. For the fiscal years ended October 31, 2014, 2015 and 2016, the Fund paid the following amounts for these services:

Administration Fees Paid		
2014	2015	2016
\$176,113	\$206,526	\$203,713

THE DISTRIBUTOR

General. The Trust and SEI Investments Distribution Co. (the “Distributor”), a wholly-owned subsidiary of SEI Investments and an affiliate of the Administrator, are parties to a distribution agreement dated November 14, 1991, as amended and restated November 14, 2005 and as amended August 30, 2010 (the “Distribution Agreement”) whereby the Distributor acts as principal underwriter for the Trust’s shares. The principal business address of the Distributor is One Freedom Valley Drive, Oaks, Pennsylvania 19456.

The continuance of the Distribution Agreement must be specifically approved at least annually (i) by the vote of the Trustees or by a vote of the majority of the outstanding voting securities of the Trust and (ii) by the vote of a majority of the Trustees who are not “interested persons” of the Trust and have no direct or indirect financial interest in the operations of the Distribution Agreement or any related agreement, cast in person at a meeting called for the purpose of voting on such approval. The Distribution Agreement will terminate automatically in the event of its assignment (as such term is defined in the 1940 Act), and is terminable at any time without penalty by the Board or by a majority of the outstanding voting securities of the Trust, or by the Distributor, upon not more than 60 days’ written notice to the other party.

PAYMENTS TO FINANCIAL INTERMEDIARIES

Payments by the Fund. The Fund may enter into agreements with financial intermediaries pursuant to which the Fund may pay financial intermediaries for non-distribution-related sub-transfer agency, administrative, sub-accounting, and other shareholder services. Payments made pursuant to such agreements are generally based on either (1) a percentage of the average daily net assets of Fund shareholders serviced by a financial intermediary, or (2) the number of Fund shareholders serviced by a financial intermediary.

Payments by the Adviser. The Adviser and/or its affiliates, in their discretion, may make payments from their own resources and not from Fund assets to affiliated or unaffiliated brokers, dealers, banks (including bank trust departments), trust companies, registered investment advisers, financial planners, retirement plan administrators, insurance companies, and any other institution having a service, administration, or any similar arrangement with the Fund, its service providers or their respective affiliates, as incentives to help market and promote the Fund and/or in recognition of their distribution, marketing, administrative services, and/or processing support.

These additional payments may be made to financial intermediaries that sell Fund shares or provide services to the Fund, the Distributor or shareholders of the Fund through the financial intermediary’s retail distribution channel and/or fund supermarkets. Payments may also be made through the financial intermediary’s retirement, qualified tuition, fee-based advisory, wrap fee bank trust, or insurance (e.g., individual or group annuity) programs. These payments may include, but are not limited to, placing the Fund in a financial intermediary’s retail distribution channel or on a preferred or recommended fund list; providing business or shareholder financial planning assistance; educating financial intermediary personnel about the Fund; providing access to sales and management representatives of the financial intermediary; promoting sales of Fund shares; providing marketing and educational support; maintaining share balances and/or for sub-accounting, administrative or shareholder transaction processing services. A financial intermediary may perform the services itself or may arrange with a third party to perform the services.

The Adviser and/or its affiliates may also make payments from their own resources to financial intermediaries for costs associated with the purchase of products or services used in connection with sales and marketing, participation in and/or presentation at conferences or seminars, sales or training programs, client and investor entertainment and other sponsored events. The costs and expenses associated with these efforts may include travel, lodging, sponsorship at educational seminars and conferences, entertainment and meals to the extent permitted by law.

Revenue sharing payments may be negotiated based on a variety of factors, including the level of sales, the amount of Fund assets attributable to investments in the Fund by financial intermediaries' customers, a flat fee or other measures as determined from time to time by the Adviser and/or its affiliates. A significant purpose of these payments is to increase the sales of Fund shares, which in turn may benefit the Adviser through increased fees as Fund assets grow.

Investors should understand that some financial intermediaries may also charge their clients fees in connection with purchases of shares or the provision of shareholder services.

THE TRANSFER AGENT

DST Systems, Inc., 333 W. 11th Street, Kansas City, Missouri 64105 (the "Transfer Agent"), serves as the Fund's transfer agent and dividend disbursing agent under a transfer agency agreement with the Trust.

THE CUSTODIAN

U.S. Bank National Association, 800 Nicollett Mall, Minneapolis, Minnesota 55402-4302 (the "Custodian"), acts as the custodian of the Fund. The Custodian holds cash, securities and other assets of the Fund as required by the 1940 Act.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Ernst & Young LLP, One Commerce Square, 2005 Market Street, Suite 700, Philadelphia, Pennsylvania 19103, serves as independent registered public accounting firm for the Fund. The financial statements and notes thereto incorporated by reference have been audited by Ernst & Young LLP, as indicated in their report with respect thereto, and are incorporated by reference in reliance on the authority of their report as experts in accounting and auditing.

LEGAL COUNSEL

Morgan, Lewis & Bockius LLP, 1701 Market Street, Philadelphia, Pennsylvania 19103-2921, serves as legal counsel to the Trust.

TRUSTEES AND OFFICERS OF THE TRUST

Board Responsibilities. The management and affairs of the Trust and its series, including the Fund described in this SAI, are overseen by the Board. The Board has approved contracts, as described above, under which certain companies provide essential management services to the Trust.

Like most mutual funds, the day-to-day business of the Trust, including the management of risk, is performed by third party service providers, such as the Adviser, Distributor and Administrator. The Trustees are responsible for overseeing the Trust's service providers and, thus, have oversight responsibility with respect to risk management performed by those service providers. Risk management seeks to identify and address risks, i.e., events or circumstances that could have material adverse effects on the business, operations, shareholder services, investment performance or reputation of the funds. The funds and their service providers employ a variety of processes, procedures and controls to identify various possible events or circumstances, to lessen the probability of their occurrence and/or to mitigate the effects of such events or circumstances if they do occur. Each service provider is responsible for one or more discrete aspects of the Trust's business (e.g., the Adviser is responsible for the day-to-day management of the Fund's portfolio investments) and, consequently, for managing the risks associated with that business. The Board has emphasized to the funds' service providers the importance of maintaining vigorous risk management.

The Trustees' role in risk oversight begins before the inception of a fund, at which time certain of the fund's service providers present the Board with information concerning the investment objective, strategies and risks of the fund as well as proposed investment limitations for the fund. Additionally, the fund's adviser provides the Board with an overview of, among other things, its investment philosophy, brokerage practices and compliance infrastructure. Thereafter, the Board continues its

oversight function as various personnel, including the Trust's Chief Compliance Officer, as well as personnel of the adviser and other service providers, such as the fund's independent accountants, make periodic reports to the Audit Committee or to the Board with respect to various aspects of risk management. The Board and the Audit Committee oversee efforts by management and service providers to manage risks to which the funds may be exposed.

The Board is responsible for overseeing the nature, extent and quality of the services provided to the funds by the adviser and receives information about those services at its regular meetings. In addition, on an annual basis, in connection with its consideration of whether to renew the advisory agreement with the adviser, the Board meets with the adviser to review such services. Among other things, the Board regularly considers the adviser's adherence to the funds' investment restrictions and compliance with various fund policies and procedures and with applicable securities regulations. The Board also reviews information about the funds' investments, including, for example, reports on the adviser's use of derivatives in managing the funds, if any, as well as reports on the funds' investments in other investment companies, if any.

The Trust's Chief Compliance Officer reports regularly to the Board to review and discuss compliance issues and fund and adviser risk assessments. At least annually, the Trust's Chief Compliance Officer provides the Board with a report reviewing the adequacy and effectiveness of the Trust's policies and procedures and those of its service providers, including the adviser. The report addresses the operation of the policies and procedures of the Trust and each service provider since the date of the last report; any material changes to the policies and procedures since the date of the last report; any recommendations for material changes to the policies and procedures; and any material compliance matters since the date of the last report.

The Board receives reports from the funds' service providers regarding operational risks and risks related to the valuation and liquidity of portfolio securities. The Trust's Fair Value Pricing Committee makes regular reports to the Board concerning investments for which market quotations are not readily available. Annually, the independent registered public accounting firm reviews with the Audit Committee its audit of the funds' financial statements, focusing on major areas of risk encountered by the funds and noting any significant deficiencies or material weaknesses in the funds' internal controls. Additionally, in connection with its oversight function, the Board oversees fund management's implementation of disclosure controls and procedures, which are designed to ensure that information required to be disclosed by the Trust in its periodic reports with the SEC are recorded, processed, summarized, and reported within the required time periods. The Board also oversees the Trust's internal controls over financial reporting, which comprise policies and procedures designed to provide reasonable assurance regarding the reliability of the Trust's financial reporting and the preparation of the Trust's financial statements.

From their review of these reports and discussions with the adviser, the Chief Compliance Officer, the independent registered public accounting firm and other service providers, the Board and the Audit Committee learn in detail about the material risks of the funds, thereby facilitating a dialogue about how management and service providers identify and mitigate those risks.

The Board recognizes that not all risks that may affect the funds can be identified and/or quantified, that it may not be practical or cost-effective to eliminate or mitigate certain risks, that it may be necessary to bear certain risks (such as investment-related risks) to achieve the funds' goals, and that the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, reports received by the Trustees as to risk management matters are typically summaries of the relevant information. Most of the funds' investment management and business affairs are carried out by or through the funds' adviser and other service providers, each of which has an independent interest in risk management but whose policies and the methods by which one or more risk management functions are carried out may differ from the funds' and each other's in the setting of priorities, the resources available or the effectiveness of relevant controls. As a result of the foregoing and other factors, the Board's ability to monitor and manage risk, as a practical matter, is subject to limitations.

Members of the Board. There are eight members of the Board, six of whom are not interested persons of the Trust, as that term is defined in the 1940 Act ("independent Trustees"). Robert Nesher, an interested person of the Trust, serves as Chairman of the Board. George Sullivan, Jr., an independent Trustee, serves as the lead independent Trustee. The Trust has determined its leadership structure is appropriate given the specific characteristics and circumstances of the Trust. The Trust made this determination in consideration of, among other things, the fact that the independent Trustees constitute a super-majority (75%) of the Board, the fact that the chairperson of each Committee of the Board is an independent Trustee, the amount of assets under management in the Trust, and the number of funds (and classes of shares) overseen by the Board. The Board also believes that

its leadership structure facilitates the orderly and efficient flow of information to the independent Trustees from fund management.

The Board has two standing committees: the Audit Committee and Governance Committee. The Audit Committee and Governance Committee are chaired by an independent Trustee and composed of all of the independent Trustees. In addition, the Board has a lead independent Trustee.

In his role as lead independent Trustee, Mr. Sullivan, among other things: (i) presides over Board meetings in the absence of the Chairman of the Board; (ii) presides over executive sessions of the independent Trustees; (iii) along with the Chairman of the Board, oversees the development of agendas for Board meetings; (iv) facilitates communication between the independent Trustees and management, and among the independent Trustees; (v) serves as a key point person for dealings between the independent Trustees and management; and (vi) has such other responsibilities as the Board or independent Trustees determine from time to time.

Set forth below are the names, years of birth, position with the Trust and length of time served, and the principal occupations and other directorships held during at least the last five years of each of the persons currently serving as a Trustee. There is no stated term of office for the Trustees. Nevertheless, an independent Trustee must retire from the Board as of the end of the calendar year in which such independent Trustee first attains the age of seventy-five years; provided, however, that, an independent Trustee may continue to serve for one or more additional one calendar year terms after attaining the age of seventy-five years (each calendar year a “Waiver Term”) if, and only if, prior to the beginning of such Waiver Term: (1) the Governance Committee (a) meets to review the performance of the independent Trustee; (b) finds that the continued service of such independent Trustee is in the best interests of the Trust; and (c) unanimously approves excepting the independent Trustee from the general retirement policy set out above; and (2) a majority of the Trustees approves excepting the independent Trustee from the general retirement policy set out above. Unless otherwise noted, the business address of each Trustee is SEI Investments Company, One Freedom Valley Drive, Oaks, Pennsylvania 19456.

Member of the independent review committee for SEI’s Canadian-registered mutual funds. Former Directorships: Director of SEI Opportunity Fund, L.P. to 2010. Director of SEI Alpha Strategy Portfolios, LP to 2013. Trustee of SEI Liquid Asset Trust to 2016.

1 Denotes Trustees who may be deemed to be “interested” persons of the Fund as that term is defined in the 1940 Act by virtue of their affiliation with the Distributor and/or its affiliates.

Individual Trustee Qualifications

The Trust has concluded that each of the Trustees should serve on the Board because of their ability to review and understand information about the Fund provided to them by management, to identify and request other information they may deem relevant to the performance of their duties, to question management and other service providers regarding material factors bearing on the management and administration of the Fund, and to exercise their business judgment in a manner that serves the best interests of the Fund’s shareholders. The Trust has concluded that each of the Trustees should serve as a Trustee based on their own experience, qualifications, attributes and skills as described below.

The Trust has concluded that Mr. Neshier should serve as Trustee because of the experience he has gained in his various roles with SEI Investments, which he joined in 1974, his knowledge of and experience in the financial services industry, and the experience he has gained serving as a trustee of the Trust since 1991.

The Trust has concluded that Mr. Doran should serve as Trustee because of the experience he gained serving as a Partner in the Investment Management and Securities Industry Practice of a large law firm, his experience in and knowledge of the financial services industry, and the experience he has gained serving as a trustee of the Trust since 1991.

The Trust has concluded that Mr. Darr should serve as Trustee because of his background in economics, the business experience he gained in a variety of roles with different financial and banking institutions and as a founder of a money management firm, his knowledge of the financial services industry, and the experience he has gained serving as a trustee of the Trust since 2008.

The Trust has concluded that Mr. Grause should serve as Trustee because of the knowledge and experience he gained in a variety of leadership roles with different financial institutions, his knowledge of the mutual fund and investment management industries, and his past experience as an interested trustee and chair of the investment committee for a multi-managed investment company.

The Trust has concluded that Mr. Johnson should serve as Trustee because of the experience he gained as a senior vice president, corporate finance, of a Fortune 500 company, his experience in and knowledge of the financial services and banking industries, the experience he gained serving as a director of other mutual funds, and the experience he has gained serving as a trustee of the Trust since 2005.

The Trust has concluded that Ms. Krikorian should serve as Trustee because of the experience she gained serving as a legal and financial services consultant, in-house counsel to a large custodian bank and Vice President of Compliance of an investment adviser, her background in fiduciary and banking law, her experience in and knowledge of the financial services industry, and the experience she has gained serving as a trustee of the Trust since 2005.

The Trust has concluded that Mr. Specca should serve as Trustee because of the knowledge and experience he gained serving as president of a mutual fund company and portfolio manager for a \$95 billion complex of asset allocation funds, and his over 25 years of experience working in a management capacity with mutual fund boards.

The Trust has concluded that Mr. Sullivan should serve as Trustee because of the experience he gained as a certified public accountant and financial consultant, his experience in and knowledge of public company accounting and auditing and the financial services industry, the experience he gained as an officer of a large financial services firm in its operations department, and his experience from serving as a trustee of the Trust since 1999.

In its periodic assessment of the effectiveness of the Board, the Board considers the complementary individual skills and experience of the individual Trustees primarily in the broader context of the Board's overall composition so that the Board, as a body, possesses the appropriate (and appropriately diverse) skills and experience to oversee the business of the funds.

Board Committees. The Board has established the following standing committees:

- **Audit Committee.** The Board has a standing Audit Committee that is composed of each of the independent Trustees. The Audit Committee operates under a written charter approved by the Board. The principal responsibilities of the Audit Committee include: (i) recommending which firm to engage as each fund's independent registered public accounting firm and whether to terminate this relationship; (ii) reviewing the independent registered public accounting firm's compensation, the proposed scope and terms of its engagement, and the firm's independence; (iii) pre-approving audit and non-audit services provided by each fund's independent registered public accounting firm to the Trust and certain other affiliated entities; (iv) serving as a channel of communication between the independent registered public accounting firm and the Trustees; (v) reviewing the results of each external audit, including any qualifications in the independent registered public accounting firm's opinion, any related management letter, management's responses to recommendations made by the independent registered public accounting firm in connection with the audit, reports submitted to the Committee by the internal auditing department of the Administrator that are material to the Trust as a whole, if any, and management's responses to any such reports; (vi) reviewing each fund's audited financial statements and considering any significant disputes between the Trust's management and the independent registered public

accounting firm that arose in connection with the preparation of those financial statements; (vii) considering, in consultation with the independent registered public accounting firm and the Trust’s senior internal accounting executive, if any, the independent registered public accounting firms’ reports on the adequacy of the Trust’s internal financial controls; (viii) reviewing, in consultation with each fund’s independent registered public accounting firm, major changes regarding auditing and accounting principles and practices to be followed when preparing each fund’s financial statements; and (ix) other audit related matters. Messrs. Darr, Grause, Johnson, Specca and Sullivan and Ms. Krikorian currently serve as members of the Audit Committee. Mr. Sullivan serves as the Chairman of the Audit Committee. The Audit Committee meets periodically, as necessary, and met four (4) times during the most recently completed fiscal year.

- **Governance Committee.** The Board has a standing Governance Committee (formerly the Nominating Committee) that is composed of each of the independent Trustees. The Governance Committee operates under a written charter approved by the Board. The principal responsibilities of the Governance Committee include: (i) considering and reviewing Board governance and compensation issues; (ii) conducting a self-assessment of the Board’s operations; (iii) selecting and nominating all persons to serve as independent Trustees and evaluating the qualifications of “interested” Trustee candidates; and (iv) reviewing shareholder recommendations for nominations to fill vacancies on the Board if such recommendations are submitted in writing and addressed to the Committee at the Trust’s office. Ms. Krikorian and Messrs. Darr, Grause, Johnson, Specca and Sullivan currently serve as members of the Governance Committee. Ms. Krikorian serves as the Chairman of the Governance Committee. The Governance Committee meets periodically, as necessary, and met four (4) times during the most recently completed fiscal year.

Fair Value Pricing Committee. The Board has also established a standing Fair Value Pricing Committee that is composed of various representatives of the Trust’s service providers, as appointed by the Board. The Fair Value Pricing Committee operates under procedures approved by the Board. The principal responsibility of the Fair Value Pricing Committee is to determine the fair value of securities for which current market quotations are not readily available. The Fair Value Pricing Committee’s determinations are reviewed by the Board.

Fund Shares Owned by Board Members. The following table shows the dollar amount range of each Trustee’s “beneficial ownership” of shares of the Fund as of the end of the most recently completed calendar year. Dollar amount ranges disclosed are established by the SEC. “Beneficial ownership” is determined in accordance with Rule 16a-1(a)(2) under the 1934 Act. The Trustees and officers of the Trust own less than 1% of the outstanding shares of the Trust.

Name	Dollar Range of Fund Shares (Fund) ¹	Aggregate Dollar Range of Shares (All Funds in the Family of Investment Companies) ¹
<u>Interested Trustees</u>		
Doran	None	None
Nesher	None	None
<u>Independent Trustees</u>		
Darr	None	None
Grause	None	None
Johnson	None	None
Krikorian	None	None
Specca	None	None
Sullivan	None	None

¹ Valuation date is December 31, 2016.

Board Compensation. The Trust paid the following fees to the Trustees during the Fund’s most recently completed fiscal year.

Name	Aggregate Compensation from the Trust	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation from the Trust and Fund Complex ¹
Interested Trustees				
Doran	\$0	N/A	N/A	\$0 for service on one (1) board
Nesher	\$0	N/A	N/A	\$0 for service on one (1) board
Independent Trustees				
Darr	\$100,923	N/A	N/A	\$100,923 for service on one (1) board
Grause	\$100,923	N/A	N/A	\$100,923 for service on one (1) board
Johnson	\$100,923	N/A	N/A	\$100,923 for service on one (1) board
Krikorian	\$106,798	N/A	N/A	\$106,798 for service on one (1) board
Specca	\$100,923	N/A	N/A	\$100,923 for service on one (1) board
Sullivan	\$113,296	N/A	N/A	\$113,296 for service on one (1) board

¹ All funds in the Fund Complex are series of the Trust.

Trust Officers. Set forth below are the names, years of birth, position with the Trust and length of time served, and the principal occupations for the last five years of each of the persons currently serving as executive officers of the Trust. There is no stated term of office for the officers of the Trust. Unless otherwise noted, the business address of each officer is SEI Investments Company, One Freedom Valley Drive, Oaks, Pennsylvania 19456. The Chief Compliance Officer is the only officer who receives compensation from the Trust for his services.

Certain officers of the Trust also serve as officers of one or more mutual funds for which SEI Investments or its affiliates act as investment manager, administrator or distributor.

Name and Year of Birth	Position with Trust and Length of Time Served	Principal Occupations in Past 5 Years
Michael Beattie (Born: 1965)	President (since 2011)	Director of Client Service, SEI Investments Company, since 2004.
Stephen Connors (Born: 1984)	Treasurer, Controller and Chief Financial Officer (since 2015)	Director, SEI Investments, Fund Accounting since 2014. Audit Manager, Deloitte & Touche LLP, from 2011 to 2014.
Dianne M. Descoteaux (Born: 1977)	Vice President and Secretary (since 2011)	Counsel at SEI Investments since 2010. Associate at Morgan, Lewis & Bockius LLP from 2006 to 2010.

Name and Year of Birth	Position with Trust and Length of Time Served	Principal Occupations in Past 5 Years
Russell Emery (Born: 1962)	Chief Compliance Officer (since 2006)	Chief Compliance Officer of SEI Structured Credit Fund, LP since June 2007. Chief Compliance Officer of SEI Alpha Strategy Portfolios, LP from June 2007 to September 2013. Chief Compliance Officer of The Advisors' Inner Circle Fund II, Bishop Street Funds, The KP Funds, The Advisors' Inner Circle Fund III, Winton Series Trust, Winton Diversified Opportunities Fund (closed-end investment company), Gallery Trust, SEI Institutional Managed Trust, SEI Asset Allocation Trust, SEI Institutional International Trust, SEI Institutional Investments Trust, SEI Daily Income Trust, SEI Tax Exempt Trust, Adviser Managed Trust, New Covenant Funds, SEI Insurance Products Trust and SEI Catholic Values Trust. Chief Compliance Officer of SEI Opportunity Fund, L.P. until 2010. Chief Compliance Officer of O'Connor EQUUS (closed-end investment company) to 2016. Chief Compliance Officer of SEI Liquid Asset Trust to 2016.
Lisa Whittaker (Born: 1978)	Vice President and Assistant Secretary (since 2013)	Attorney, SEI Investments Company (2012-present). Associate Counsel and Compliance Officer, The Glenmede Trust Company, N.A. (2011-2012). Associate, Drinker Biddle & Reath LLP (2006-2011).
John Y. Kim (Born: 1981)	Vice President and Assistant Secretary (since 2014)	Attorney, SEI Investments Company (2014-present). Associate, Stradley Ronon Stevens & Young, LLP (2009-2014).
Bridget E. Sudall (Born: 1980)	Anti-Money Laundering Compliance Officer and Privacy Officer (since 2015)	Senior Associate and AML Officer, Morgan Stanley Alternative Investment Partners from April 2011 to March 2015. Investor Services Team Lead, Morgan Stanley Alternative Investment Partners from 2007 to 2011.

PURCHASING AND REDEEMING SHARES

Purchases and redemptions may be made through the Transfer Agent on any day the New York Stock Exchange (the "NYSE") is open for business. Shares of the Fund are offered and redeemed on a continuous basis. Currently, the Trust is closed for business when the following holidays are observed: New Year's Day, Martin Luther King Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving and Christmas.

It is currently the Trust's policy to pay all redemptions in cash. The Trust retains the right, however, to alter this policy to provide for redemptions in whole or in part by a distribution in-kind of securities held by the Fund in lieu of cash. Shareholders may incur brokerage charges on the sale of any such securities so received in payment of redemptions. A shareholder will at all times be entitled to aggregate cash redemptions from all funds of the Trust up to the lesser of \$250,000 or 1% of the Trust's net assets during any 90-day period. The Trust has obtained an exemptive order from the SEC that permits the Trust to make in-kind redemptions to those shareholders of the Trust that are affiliated with the Trust solely by their ownership of a certain percentage of the Trust's investment portfolios.

The Trust reserves the right to suspend the right of redemption and/or to postpone the date of payment upon redemption during

times when the NYSE is closed, other than during customary weekends or holidays, for any period on which trading on the NYSE is restricted (as determined by the SEC by rule or regulation), or during the existence of an emergency (as determined by the SEC by rule or regulation) as a result of which disposal or valuation of the Fund's securities is not reasonably practicable, or for such other periods as the SEC has by order permitted. The Trust also reserves the right to suspend sales of shares of the Fund for any period during which the NYSE, the Adviser, the Administrator, the Transfer Agent and/or the Custodian are not open for business.

DETERMINATION OF NET ASSET VALUE

General Policy. The Fund adheres to Section 2(a)(41), and Rule 2a-4 thereunder, of the 1940 Act with respect to the valuation of portfolio securities. In general, securities for which market quotations are readily available are valued at current market value, and all other securities are valued at fair value in accordance with procedures adopted by the Board. In complying with the 1940 Act, the Trust relies on guidance provided by the SEC and by the SEC staff in various interpretive letters and other guidance.

Equity Securities. Securities listed on a securities exchange, market or automated quotation system for which quotations are readily available (except for securities traded on NASDAQ), including securities traded over the counter, are valued at the last quoted sale price on an exchange or market (foreign or domestic) on which they are traded on the valuation date (or at approximately 4:00 p.m. Eastern Time if such exchange is normally open at that time), or, if there is no such reported sale on the valuation date, at the most recent quoted bid price. For securities traded on NASDAQ, the NASDAQ Official Closing Price will be used. If such prices are not available or determined to not represent the fair value of the security as of the Fund's pricing time, the security will be valued at fair value as determined in good faith using methods approved by the Board.

Money Market Securities and other Debt Securities. If available, money market securities and other debt securities are priced based upon valuations provided by recognized independent, third-party pricing agents. Such values generally reflect the last reported sales price if the security is actively traded. The third-party pricing agents may also value debt securities by employing methodologies that utilize actual market transactions, broker-supplied valuations, or other methodologies designed to identify the market value for such securities. Such methodologies generally consider such factors as security prices, yields, maturities, call features, ratings and developments relating to specific securities in arriving at valuations. Money market securities and other debt securities with remaining maturities of sixty days or less may be valued at their amortized cost, which approximates market value. If such prices are not available or are determined to not represent the fair value of the security as of the Fund's pricing time, the security will be valued at fair value as determined in good faith using methods approved by the Board.

Foreign Securities. The prices for foreign securities are reported in local currency and converted to U.S. dollars using currency exchange rates. Exchange rates are provided daily by recognized independent pricing agents.

Derivatives and Other Complex Securities. Exchange traded options on securities and indices purchased by the Fund generally are valued at their last trade price or, if there is no last trade price, the last bid price. Exchange traded options on securities and indices written by the Fund generally are valued at their last trade price or, if there is no last trade price, the last asked price. In the case of options traded in the over-the-counter market, if the OTC option is also an exchange traded option, the Fund will follow the rules regarding the valuation of exchange traded options. If the OTC option is not also an exchange traded option, the Fund will value the option at fair value in accordance with procedures adopted by the Board.

Futures and swaps cleared through a central clearing house ("centrally cleared swaps") are valued at the settlement price established each day by the board of the exchange on which they are traded. The daily settlement prices for financial futures are provided by an independent source. On days when there is excessive volume or market volatility, or the future or centrally cleared swap does not end trading by the time the Fund calculates NAV, the settlement price may not be available at the time at which the Fund calculates its NAV. On such days, the best available price (which is typically the last sales price) may be used to value the Fund's futures or centrally cleared swaps position.

Foreign currency forward contracts are valued at the current day's interpolated foreign exchange rate, as calculated using the current day's spot rate, and the thirty, sixty, ninety and one-hundred eighty day forward rates provided by an independent source.

If available, non-centrally cleared swaps, collateralized debt obligations, collateralized loan obligations and bank loans are priced based on valuations provided by an independent third party pricing agent. If a price is not available from an independent third party pricing agent, the security will be valued at fair value as determined in good faith using methods approved by the Board.

Use of Third-Party Independent Pricing Agents and Independent Brokers. Pursuant to contracts with the Administrator, prices for most securities held by the Fund are provided daily by third-party independent pricing agents that are approved by the Board. The valuations provided by third-party independent pricing agents are reviewed daily by the Administrator.

If a security price cannot be obtained from an independent, third-party pricing agent, the Administrator shall seek to obtain a bid price from at least one independent broker.

Fair Value Procedures. Securities for which market prices are not “readily available” or which cannot be valued using the methodologies described above are valued in accordance with Fair Value Procedures established by the Board and implemented through the Fair Value Pricing Committee. The members of the Fair Value Pricing Committee report, as necessary, to the Board regarding portfolio valuation determinations. The Board, from time to time, will review these methods of valuation and will recommend changes which may be necessary to assure that the investments of the Fund are valued at fair value.

Some of the more common reasons that may necessitate a security being valued using Fair Value Procedures include: the security’s trading has been halted or suspended; the security has been de-listed from a national exchange; the security’s primary trading market is temporarily closed at a time when under normal conditions it would be open; the security has not been traded for an extended period of time; the security’s primary pricing source is not able or willing to provide a price; trading of the security is subject to local government-imposed restrictions; or a significant event with respect to a security has occurred after the close of the market or exchange on which the security principally trades and before the time the Fund calculates NAV. When a security is valued in accordance with the Fair Value Procedures, the Fair Value Pricing Committee will determine the value after taking into consideration relevant information reasonably available to the Fair Value Pricing Committee.

TAXES

The following is only a summary of certain additional U.S. federal income tax considerations generally affecting the Fund and its shareholders that is intended to supplement the discussion contained in the Prospectus. No attempt is made to present a detailed explanation of the tax treatment of the Fund or its shareholders, and the discussion here and in the Prospectus is not intended as a substitute for careful tax planning. Shareholders are urged to consult their tax advisors with specific reference to their own tax situations, including their state, local, and foreign tax liabilities.

The following general discussion of certain federal income tax consequences is based on the Code and the regulations issued thereunder as in effect on the date of this SAI. New legislation, as well as administrative changes or court decisions, may significantly change the conclusions expressed herein, and may have a retroactive effect with respect to the transactions contemplated herein.

Qualification as a Regulated Investment Company (“RIC”). The Fund intends to qualify and elects to be treated as a RIC. By following such a policy, the Fund expects to eliminate or reduce to a nominal amount the federal taxes to which it may be subject. If the Fund qualifies as a RIC, it will generally not be subject to federal income taxes on the net investment income and net realized capital gains that it timely distributes to its shareholders. The Board reserves the right not to maintain the qualification of the Fund as a RIC if it determines such course of action to be beneficial to shareholders.

In order to qualify as a RIC under the Code, the Fund must distribute annually to its shareholders at least 90% of its net investment income, (which includes dividends, taxable interest, and the excess of net short-term capital gains over net long-term capital losses, less operating expenses) and at least 90% of its net tax exempt interest income, for each tax year, if any, to its shareholders (the “Distribution Requirement”) and also must meet certain additional requirements. Among these requirements are the following: (i) at least 90% of the Fund’s gross income each taxable year must be derived from dividends, interest,

payments with respect to certain securities loans, and gains from the sale or other disposition of stock, securities, or foreign currencies, or other income (including but not limited to gains from options, futures or forward contracts) derived with respect to its business of investing in such stock, securities, or currencies, and net income derived from an interest in a qualified publicly traded partnership (the “Qualifying Income Test”); and (ii) at the close of each quarter of the Fund’s taxable year: (A) at least 50% of the value of its total assets must be represented by cash and cash items, U.S. government securities, securities of other RICs and other securities, with such other securities limited, in respect to any one issuer, to an amount not greater than 5% of the value of the Fund’s total assets and that does not represent more than 10% of the outstanding voting securities of such issuer, including the equity securities of a qualified publicly traded partnership, and (B) not more than 25% of the value of its total assets is invested in the securities (other than U.S. government securities or securities of another RIC) of any one issuer or the securities (other than the securities of other RICs) of two or more issuers that the Fund controls and which are engaged in the same or similar trades or businesses or related trades or businesses, or the securities of one or more qualified publicly traded partnerships (the “Asset Test”).

Although the Fund intends to distribute substantially all of its net investment income and may distribute its capital gains for any taxable year, the Fund will be subject to federal income taxation to the extent any such income or gains are not distributed.

If the Fund fails to satisfy the Qualifying Income or Asset Tests in any taxable year, the Fund may be eligible for relief provisions if the failures are due to reasonable cause and not willful neglect and if a penalty tax is paid with respect to each failure to satisfy the applicable requirements. Additionally, relief is provided for certain *de minimis* failures of the diversification requirements where the Fund corrects the failure within a specified period. If the Fund fails to maintain qualification as a RIC for a tax year, and the relief provisions are not available, the Fund will be subject to federal income tax at regular corporate rates without any deduction for distributions to shareholders. In such case, its shareholders would be taxed as if they received ordinary dividends, although corporate shareholders could be eligible for the dividends received deduction (subject to certain limitations) and individuals may be able to benefit from the lower tax rates available to qualified dividend income. In addition, the Fund could be required to recognize unrealized gains, pay substantial taxes and interest, and make substantial distributions before requalifying as a RIC. The Board reserves the right not to maintain the qualification of the Fund as a RIC if it determines such course of action to be beneficial to shareholders.

The Fund may elect to treat part or all of any “qualified late year loss” as if it had been incurred in the succeeding taxable year in determining the Fund’s taxable income, net capital gain, net short-term capital gain, and earnings and profits. The effect of this election is to treat any such “qualified late year loss” as if it had been incurred in the succeeding taxable year in characterizing Fund distributions for any calendar year. A “qualified late year loss” generally includes net capital loss, net long-term capital loss, or net short-term capital loss incurred after October 31 of the current taxable year (commonly referred to as “post-October losses”) and certain other late-year losses.

The treatment of capital loss carryovers for the Fund is similar to the rules that apply to capital loss carryovers of individuals which provide that such losses are carried over by the Fund indefinitely. If the Fund has a “net capital loss” (that is, capital losses in excess of capital gains) for a taxable year beginning after December 22, 2010 (a “Post-2010 Loss”), the excess of the Fund’s net short-term capital losses over its net long-term capital gains is treated as a short-term capital loss arising on the first day of the Fund’s next taxable year, and the excess (if any) of the Fund’s net long-term capital losses over its net short-term capital gains is treated as a long-term capital loss arising on the first day of the Fund’s next taxable year. The Fund’s unused capital loss carryforwards that arose in taxable years that began on or before December 22, 2010 (“Pre-2011 Losses”) are available to be applied against future capital gains, if any, realized by the Fund prior to the expiration of those carryforwards, generally eight years after the year in which they arose. The Fund’s Post-2010 Losses must be fully utilized before the Fund will be permitted to utilize carryforwards of Pre-2011 Losses. In addition, the carryover of capital losses may be limited under the general loss limitation rules if the Fund experiences an ownership change as defined in the Code.

Federal Excise Tax. Notwithstanding the Distribution Requirement described above, which generally requires the Fund to distribute at least 90% of its annual investment company taxable income and the excess of its exempt interest income (but does not require any minimum distribution of net capital gain), the Fund will be subject to a nondeductible 4% federal excise tax to the extent it fails to distribute, by the end of the calendar year at least 98% of its ordinary income and 98.2% of its capital gain net income (the excess of short- and long-term capital gains over short- and long-term capital losses) for the one-year period

ending on October 31 of such year (including any retained amount from the prior calendar year on which the Fund paid no federal income tax). The Fund intends to make sufficient distributions to avoid liability for federal excise tax, but can make no assurances that such tax will be completely eliminated. The Fund may in certain circumstances be required to liquidate Fund investments in order to make sufficient distributions to avoid federal excise tax liability at a time when the Adviser might not otherwise have chosen to do so, and liquidation of investments in such circumstances may affect the ability of the Fund to satisfy the requirement for qualification as a RIC.

Distributions to Shareholders. The Fund receives income generally in the form of dividends and interest on investments. This income, plus net short-term capital gains, if any, less expenses incurred in the operation of the Fund, constitutes the Fund's net investment income from which dividends may be paid to you. Any distributions by the Fund from such income will be taxable to you as ordinary income or at the lower capital gains rates that apply to individuals receiving qualified dividend income, whether you take them in cash or in additional shares.

Distributions by the Fund are currently eligible for the reduced maximum tax rate to individuals of 20% (lower rates apply to individuals in lower tax brackets) to the extent that the Fund receives qualified dividend income on the securities it holds and the Fund reports the distributions as qualified dividend income. Qualified dividend income is, in general, dividend income from taxable domestic corporations and certain foreign corporations (e.g., foreign corporations incorporated in a possession of the United States or in certain countries with a comprehensive tax treaty with the United States, or the stock of which is readily tradable on an established securities market in the United States). A dividend will not be treated as qualified dividend income to the extent that: (i) the shareholder has not held the shares on which the dividend was paid for more than 60 days during the 121-day period that begins on the date that is 60 days before the date on which the shares become "ex-dividend" (which is the day on which declared distributions (dividends or capital gains) are deducted from the Fund's assets before it calculates the NAV) with respect to such dividend, (ii) the Fund has not satisfied similar holding period requirements with respect to the securities it holds that paid the dividends distributed to the shareholder, (iii) the shareholder is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to substantially similar or related property, or (iv) the shareholder elects to treat such dividend as investment income under section 163(d)(4)(B) of the Code. Therefore, if you lend your shares in the Fund, such as pursuant to a securities lending arrangement, you may lose the ability to treat dividends (paid while the shares are held by the borrower) as qualified dividend income.

Distributions by the Fund of its net short-term capital gains will be taxable as ordinary income. Capital gain distributions consisting of the Fund's net capital gains will be taxable as long-term capital gains for individual shareholders currently set at a maximum rate of 20% regardless of how long you have held your shares in the Fund.

In the case of corporate shareholders, the Fund's distributions (other than capital gain distributions) generally qualify for the dividends received deduction to the extent such distributions are so reported and do not exceed the gross amount of qualifying dividends received by the Fund for the year. Generally, and subject to certain limitations (including certain holding period limitations), a dividend will be treated as a qualifying dividend if it has been received from a domestic corporation. All such qualifying dividends (including the deducted portion) must be included in your alternative minimum taxable income calculation.

To the extent that the Fund makes a distribution of income received by the Fund in lieu of dividends (a "substitute payment") with respect to securities on loan pursuant to a securities lending transaction, such income will not constitute qualified dividend income to individual shareholders and will not be eligible for the dividends received deduction for corporate shareholders.

If the Fund's distributions exceed its taxable income and capital gains realized during a taxable year, all or a portion of the distributions made in the same taxable year may be recharacterized as a return of capital to shareholders. A return of capital distribution will generally not be taxable, but will reduce each shareholder's cost basis in the Fund and result in a higher reported capital gain or lower reported capital loss when those shares on which the distribution was received are sold.

A dividend or distribution received shortly after the purchase of shares reduces the NAV of the shares by the amount of the dividend or distribution and, although in effect a return of capital, will be taxable to the shareholder. If the NAV of shares were reduced below the shareholder's cost by dividends or distributions representing gains realized on sales of securities, such dividends or distributions would be a return of investment though taxable to the shareholder in the same manner as other

dividends or distributions.

The Fund (or its administrative agent) will inform you of the amount of your ordinary income dividends, qualified dividend income and capital gain distributions, if any, and will advise you of their tax status for federal income tax purposes shortly after the close of each calendar year. If you have not held your shares for a full year, the Fund may designate and distribute to you, as ordinary income, qualified dividend income or capital gain, a percentage of income that is not equal to the actual amount of such income earned during the period of your investment in the Fund.

Dividends declared to shareholders of record in October, November or December and actually paid in January of the following year will be treated as having been received by shareholders on December 31 of the calendar year in which declared. Under this rule, therefore, a shareholder may be taxed in one year on dividends or distributions actually received in January of the following year.

Sales or Redemptions. Any gain or loss recognized on a sale or redemption of shares of the Fund by a shareholder who is not a dealer in securities will generally, for individual shareholders, be treated as a long-term capital gain or loss if the shares have been held for more than twelve months and otherwise will be treated as a short-term capital gain or loss. However, if shares on which a shareholder has received a long-term capital gain distribution are subsequently sold or redeemed and such shares have been held for six months or less, any loss recognized will be treated as a long-term capital loss to the extent of the long-term capital gain distribution. In addition, the loss realized on a sale or other disposition of shares will be disallowed to the extent a shareholder repurchases (or enters into a contract to or option to repurchase) shares within a period of 61 days (beginning 30 days before and ending 30 days after the disposition of the shares). This loss disallowance rule will apply to shares received through the reinvestment of dividends during the 61-day period.

U.S. individuals with income exceeding \$200,000 (\$250,000 if married and filing jointly) are subject to a 3.8% Medicare contribution tax on their “net investment income,” including interest, dividends, and capital gains (including any capital gains realized on the sale of shares of the Fund).

The Fund (or its administrative agent) must report to the Internal Revenue Service (“IRS”) and furnish to Fund shareholders the cost basis information for Fund shares purchased on or after January 1, 2012, and sold on or after that date. In addition to the requirement to report the gross proceeds from the sale of Fund shares, the Fund is also required to report the cost basis information for such shares and indicate whether these shares had a short-term or long-term holding period. For each sale of Fund shares, the Fund will permit Fund shareholders to elect from among several IRS-accepted cost basis methods, including the average basis method. In the absence of an election, the Fund will use the average basis method as its default cost basis method. The cost basis method elected by the Fund shareholder (or the cost basis method applied by default) for each sale of Fund shares may not be changed after the settlement date of each such sale of Fund shares. Fund shareholders should consult with their tax advisors to determine the best IRS-accepted cost basis method for their tax situation and to obtain more information about cost basis reporting. Shareholders also should carefully review the cost basis information provided to them and make any additional basis, holding period or other adjustments that are required when reporting these amounts on their federal income tax returns.

Tax Treatment of Complex Securities. The Fund may invest in complex securities and these investments may be subject to numerous special and complex tax rules. These rules could affect the Fund’s ability to qualify as a RIC, affect whether gains and losses recognized by the Fund are treated as ordinary income or capital gain, accelerate the recognition of income to the Fund and/or defer the Fund’s ability to recognize losses, and, in limited cases, subject the Fund to U.S. federal income tax on income from certain of its foreign securities. In turn, these rules may affect the amount, timing or character of the income distributed to you by the Fund.

The Fund is required for federal income tax purposes to mark-to-market and recognize as income for each taxable year its net unrealized gains and losses on certain futures contracts as of the end of the year as well as those actually realized during the year. Gain or loss from futures and options contracts on broad-based indexes required to be marked to market will be 60% long-term and 40% short-term capital gain or loss. Application of this rule may alter the timing and character of distributions to shareholders. The Fund may be required to defer the recognition of losses on futures contracts, options contracts and swaps to

the extent of any unrecognized gains on offsetting positions held by the Fund. These provisions may also require the Fund to mark-to-market certain types of positions in its portfolio (i.e., treat them as if they were closed out), which may cause the Fund to recognize income without receiving cash with which to make distributions in amounts necessary to satisfy the Distribution Requirement and for avoiding the excise tax discussed above. Accordingly, in order to avoid certain income and excise taxes, the Fund may be required to liquidate its investments at a time when the Adviser might not otherwise have chosen to do so.

Foreign Taxes. Dividends and interest received by the Fund may be subject to income, withholding or other taxes imposed by foreign countries and U.S. possessions that would reduce the yield on the Fund's stock or securities. Tax conventions between certain countries and the United States may reduce or eliminate these taxes. Foreign countries generally do not impose taxes on capital gains with respect to investments by foreign investors.

Tax-Exempt Shareholders. Certain tax-exempt shareholders, including qualified pension plans, individual retirement accounts, salary deferral arrangements, 401(k)s, and other tax-exempt entities, generally are exempt from federal income taxation except with respect to their unrelated business taxable income ("UBTI"). Under current law, the Fund generally serves to block UBTI from being realized by its tax-exempt shareholders. However, notwithstanding the foregoing, the tax-exempt shareholder could realize UBTI by virtue of an investment in the Fund where, for example: (i) the Fund invests in residual interests of Real Estate Mortgage Investment Conduits ("REMICs"), (ii) the Fund invests in a REIT that is a taxable mortgage pool ("TMP") or that has a subsidiary that is a TMP or that invests in the residual interest of a REMIC, or (iii) shares in the Fund constitute debt-financed property in the hands of the tax-exempt shareholder within the meaning of section 514(b) of the Code. Charitable remainder trusts are subject to special rules and should consult their tax advisor. The IRS has issued guidance with respect to these issues and prospective shareholders, especially charitable remainder trusts, are strongly encouraged to consult their tax advisors regarding these issues.

Backup Withholding. The Fund will be required in certain cases to withhold at a 28% withholding rate and remit to the U.S. Treasury the amount withheld on amounts payable to any shareholder who: (i) has provided the Fund either an incorrect tax identification number or no number at all; (ii) is subject to backup withholding by the IRS for failure to properly report payments of interest or dividends; (iii) has failed to certify to the Fund that such shareholder is not subject to backup withholding; or (iv) has failed to certify to the Fund that the shareholder is a U.S. person (including a resident alien).

Non-U.S. Investors. Any non-U.S. investors in the Fund may be subject to U.S. withholding and estate tax and are encouraged to consult their tax advisors prior to investing in the Fund. Foreign shareholders (i.e., nonresident alien individuals and foreign corporations, partnerships, trusts and estates) are generally subject to U.S. withholding tax at the rate of 30% (or a lower tax treaty rate) on distributions derived from taxable ordinary income. The Fund may, under certain circumstances, report all or a portion of a dividend as an "interest-related dividend" or a "short-term capital gain dividend," which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Short-term capital gain dividends received by a nonresident alien individual who is present in the U.S. for a period or periods aggregating 183 days or more during the taxable year are not exempt from this 30% withholding tax. Gains realized by foreign shareholders from the sale or other disposition of shares of the Fund generally are not subject to U.S. taxation, unless the recipient is an individual who is physically present in the U.S. for 183 days or more per year. Foreign shareholders who fail to provide an applicable IRS form may be subject to backup withholding on certain payments from the Fund. Backup withholding will not be applied to payments that are subject to the 30% (or lower applicable treaty rate) withholding tax described above. Different tax consequences may result if the foreign shareholder is engaged in a trade or business within the United States. In addition, the tax consequences to a foreign shareholder entitled to claim the benefits of a tax treaty may be different than those described above.

Under legislation generally known as "FATCA" (the Foreign Account Tax Compliance Act), the Fund is required to withhold 30% of certain ordinary dividends it pays, and, after December 31, 2018, 30% of the gross proceeds of share redemptions and certain capital gain dividends it pays, to shareholders that fail to meet prescribed information reporting or certification requirements. In general, no such withholding will be required with respect to a U.S. person or non-U.S. individual that timely provides the certifications required by the Fund or its agent on a valid IRS Form W-9 or applicable IRS Form W-8, respectively. Shareholders potentially subject to withholding include foreign financial institutions ("FFIs"), such as non-U.S. investment funds, and non-financial foreign entities ("NFFEs"). To avoid withholding under FATCA, an FFI generally must enter into an information sharing agreement with the IRS in which it agrees to report certain identifying information (including name,

address, and taxpayer identification number) with respect to its U.S. account holders (which, in the case of an entity shareholder, may include its direct and indirect U.S. owners), and an NFFE generally must identify and provide other required information to the Fund or other withholding agent regarding its U.S. owners, if any. Such non-U.S. shareholders also may fall into certain exempt, excepted or deemed compliant categories as established by regulations and other guidance. A non-U.S. shareholder resident or doing business in a country that has entered into an intergovernmental agreement with the U.S. to implement FATCA will be exempt from FATCA withholding provided that the shareholder and the applicable foreign government comply with the terms of the agreement.

A non-U.S. entity that invests in the Fund will need to provide the Fund with documentation properly certifying the entity's status under FATCA in order to avoid FATCA withholding. Non-U.S. investors in the Fund should consult their tax advisors in this regard.

Tax Shelter Reporting Regulations. Under U.S. Treasury regulations, generally, if a shareholder recognizes a loss of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder, the shareholder must file with the IRS a disclosure statement on Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a RIC such as the Fund are not excepted. Future guidance may extend the current exception from this reporting requirement to shareholders of most or all RICs. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Shareholders should consult their tax advisors to determine the applicability of these regulations in light of their individual circumstances.

State Taxes. Depending upon state and local law, distributions by the Fund to its shareholders and the ownership of such shares may be subject to state and local taxes. Rules of state and local taxation of dividend and capital gains distributions from RICs often differ from the rules for federal income taxation described above. It is expected that the Fund will not be liable for any corporate excise, income or franchise tax in Massachusetts if it qualifies as a RIC for federal income tax purposes.

Many states grant tax-free status to dividends paid to you from interest earned on direct obligations of the U.S. government, subject in some states to minimum investment requirements that must be met by the Fund. Investment in Ginnie Mae or Fannie Mae securities, banker's acceptances, commercial paper, and repurchase agreements collateralized by U.S. government securities do not generally qualify for such tax-free treatment. The rules on exclusion of this income are different for corporate shareholders. Shareholders are urged to consult their tax advisors regarding state and local taxes applicable to an investment in the Fund.

Fund shares held in a tax-qualified retirement account will generally not be subject to federal taxation on income and capital gains distribution from the Fund until a shareholder begins receiving payments from its retirement account. Because each shareholder's tax situation is different, shareholders should consult their tax advisor about the tax implications of an investment in the Fund.

FUND TRANSACTIONS

Brokerage Transactions. Generally, equity securities, both listed and over-the-counter, are bought and sold through brokerage transactions for which commissions are payable. Purchases from underwriters will include the underwriting commission or concession, and purchases from dealers serving as market makers will include a dealer's mark-up or reflect a dealer's mark-down. Money market securities and other debt securities are usually bought and sold directly from the issuer or an underwriter or market maker for the securities. Generally, the Fund will not pay brokerage commissions for such purchases. When a debt security is bought from an underwriter, the purchase price will usually include an underwriting commission or concession. The purchase price for securities bought from dealers serving as market makers will similarly include the dealer's mark up or reflect a dealer's mark down. When the Fund executes transactions in the over-the-counter market, it will generally deal with primary market makers unless prices that are more favorable are otherwise obtainable.

In addition, the Adviser may place a combined order for two or more accounts it manages, including the Fund, engaged in the purchase or sale of the same security if, in its judgment, joint execution is in the best interest of each participant and will result

in best price and execution. Transactions involving commingled orders are allocated in a manner deemed equitable to each account or fund. Although it is recognized that, in some cases, the joint execution of orders could adversely affect the price or volume of the security that a particular account or the Fund may obtain, it is the opinion of the Adviser that the advantages of combined orders outweigh the possible disadvantages of separate transactions.

For the fiscal years ended October 31, 2014, 2015 and 2016, the Fund paid the following aggregate brokerage commissions on portfolio transactions:

Aggregate Dollar Amount of Brokerage Commissions Paid		
2014	2015	2016
\$26,848	\$23,723	\$30,644

Brokerage Selection. The Trust does not expect to use one particular broker or dealer, and when one or more brokers is believed capable of providing the best combination of price and execution, the Adviser may select a broker based upon brokerage or research services provided to the Adviser. The Adviser may pay a higher commission than otherwise obtainable from other brokers in return for such services only if a good faith determination is made that the commission is reasonable in relation to the services provided.

Section 28(e) of the 1934 Act permits the Adviser, under certain circumstances, to cause the Fund to pay a broker or dealer a commission for effecting a transaction in excess of the amount of commission another broker or dealer would have charged for effecting the transaction in recognition of the value of brokerage and research services provided by the broker or dealer. In addition to agency transactions, the Adviser may receive brokerage and research services in connection with certain riskless principal transactions, in accordance with applicable SEC guidance. Brokerage and research services include: (1) furnishing advice as to the value of securities, the advisability of investing in, purchasing or selling securities, and the availability of securities or purchasers or sellers of securities; (2) furnishing analyses and reports concerning issuers, industries, securities, economic factors and trends, portfolio strategy, and the performance of accounts; and (3) effecting securities transactions and performing functions incidental thereto (such as clearance, settlement, and custody). In the case of research services, the Adviser believes that access to independent investment research is beneficial to its investment decision-making processes and, therefore, to the Fund.

To the extent that research services may be a factor in selecting brokers, such services may be in written form or through direct contact with individuals and may include information as to particular companies and securities as well as market, economic, or institutional areas and information which assists in the valuation and pricing of investments. Examples of research-oriented services for which the Adviser might utilize Fund commissions include research reports and other information on the economy, industries, sectors, groups of securities, individual companies, statistical information, political developments, technical market action, pricing and appraisal services, credit analysis, risk measurement analysis, performance and other analysis. The Adviser may use research services furnished by brokers in servicing all client accounts and not all services may necessarily be used by the Adviser in connection with the Fund or any other specific client account that paid commissions to the broker providing such services. Information so received by the Adviser will be in addition to and not in lieu of the services required to be performed by the Adviser under the Advisory Agreement. Any advisory or other fees paid to the Adviser are not reduced as a result of the receipt of research services.

In some cases the Adviser may receive a service from a broker that has both a “research” and a “non-research” use. When this occurs, the Adviser makes a good faith allocation, under all the circumstances, between the research and non-research uses of the service. The percentage of the service that is used for research purposes may be paid for with client commissions, while the Adviser will use its own funds to pay for the percentage of the service that is used for non-research purposes. In making this good faith allocation, the Adviser faces a potential conflict of interest, but the Adviser believes that its allocation procedures are reasonably designed to ensure that it appropriately allocates the anticipated use of such services to their research and non-research uses.

From time to time, the Adviser may purchase new issues of securities for clients, including the Fund, in a fixed price offering. In these situations, the seller may be a member of the selling group that will, in addition to selling securities, provide the Adviser

with research services. The Financial Industry Regulatory Authority (“FINRA”) has adopted rules expressly permitting these types of arrangements under certain circumstances. Generally, the seller will provide research “credits” in these situations at a rate that is higher than that which is available for typical secondary market transactions. These arrangements may not fall within the safe harbor of Section 28(e).

For the fiscal year ended October 31, 2016, the Fund paid no commissions on brokerage transactions directed to brokers pursuant to an agreement or understanding whereby the broker provides research or other brokerage services to the Adviser.

Brokerage with Fund Affiliates. The Fund may execute brokerage or other agency transactions through registered broker-dealer affiliates of either the Fund or the Adviser for a commission in conformity with the 1940 Act and rules promulgated by the SEC. The 1940 Act requires that commissions paid to the affiliate by the Fund for exchange transactions not exceed “usual and customary” brokerage commissions. The rules define “usual and customary” commissions to include amounts which are “reasonable and fair compared to the commission, fee or other remuneration received or to be received by other brokers in connection with comparable transactions involving similar securities being purchased or sold on a securities exchange during a comparable period of time.” The Trustees, including those who are not “interested persons” of the Fund, have adopted procedures for evaluating the reasonableness of commissions paid to affiliates and review these procedures periodically.

For the fiscal years ended October 31, 2014, 2015 and 2016, the Fund did not pay brokerage commissions on portfolio transactions effected by affiliated brokers.

Securities of “Regular Broker-Dealers.” The Fund is required to identify any securities of its “regular brokers and dealers” (as such term is defined in the 1940 Act) that the Fund held during its most recent fiscal year. During the most recent fiscal year, the Fund held securities of its “regular brokers or dealers” as follows:

Name of Broker/Dealer	Type of Security Held	Dollar Amount at FYE (in thousands)
JP Morgan Chase	Equity	\$7,581

Portfolio Turnover Rates. Portfolio turnover rate is defined under SEC rules as the value of the securities purchased or securities sold, excluding all securities whose maturities at the time of acquisition were one-year or less, divided by the average monthly value of such securities owned during the year. Based on this definition, instruments with remaining maturities of less than one-year are excluded from the calculation of the portfolio turnover rate. Instruments excluded from the calculation of portfolio turnover generally would include the futures contracts in which the Fund may invest since such contracts generally have remaining maturities of less than one-year. The Fund may at times hold investments in other short-term instruments, such as repurchase agreements, which are excluded for purposes of computing portfolio turnover. For the fiscal years ended October 31, 2015 and 2016, the Fund’s portfolio turnover rates were as follows:

Portfolio Turnover Rates	
2015	2016
17%	15%

PORTFOLIO HOLDINGS

The Board has approved policies and procedures that govern the timing and circumstances regarding the disclosure of Fund portfolio holdings information to shareholders and third parties. These policies and procedures are designed to ensure that disclosure of information regarding the Fund’s portfolio securities is in the best interests of Fund shareholders, on the one hand, and include procedures to address conflicts between the interests of the Fund’s shareholders and those of the Adviser, principal underwriter, or any affiliated person of the Fund, the Adviser, or its principal underwriter, on the other. Pursuant to such procedures, the Board has authorized the Adviser’s Chief Compliance Officer (“Authorized Person”) to authorize the release of the Fund’s portfolio holdings, as necessary, in conformity with the foregoing principles. The Authorized Person, either directly

or through reports by the Trust's Chief Compliance Officer, reports quarterly to the Board regarding the operation and administration of such policies and procedures.

Pursuant to applicable law, the Fund is required to disclose its complete portfolio holdings quarterly, within 60 days of the end of each fiscal quarter (currently, each January 31, April 30, July 31, and October 31). The Fund will disclose a complete or summary schedule of investments (which includes the Fund's 50 largest holdings in unaffiliated issuers and each investment in unaffiliated issuers that exceeds one percent of the Fund's NAV ("Summary Schedule")) in its Semi-Annual and Annual Reports which are distributed to Fund shareholders. The Fund's complete schedule of investments following the first and third fiscal quarters is available in quarterly holdings reports filed with the SEC on Form N-Q, and the Fund's complete schedule of investments following the second and fourth fiscal quarter is available in Semi-Annual and Annual Reports filed with the SEC on Form N-CSR.

Reports filed with the SEC on Form N-Q and Form N-CSR are not distributed to Fund shareholders but are available, free of charge, on the EDGAR database on the SEC's website at www.sec.gov. Should the Fund include only a Summary Schedule rather than a complete schedule of investments in its Semi-Annual and Annual Reports, its Form N-CSR will be available without charge, upon request, by calling 1-866-301-7212.

In addition, the Adviser's website also provides information about the Fund's ten largest portfolio holdings, as of the end of the most recent calendar month. This information is provided at the end of each calendar month generally within two days of the month end. The Adviser may exclude any portion of the Fund's portfolio holdings from publication when deemed to be in the best interest of the Fund. The information on the Adviser's website is publicly available to all categories of persons.

In addition to information provided to shareholders and the general public, portfolio holdings information may be disclosed as frequently as daily to certain service providers, such as the Custodian, Administrator or Transfer Agent, in connection with their services to the Fund. From time to time rating and ranking organizations, such as S&P, Lipper and Morningstar, Inc., may request non-public portfolio holdings information in connection with rating the Fund. Similarly, institutional investors, financial planners, pension plan sponsors and/or their consultants or other third-parties may request portfolio holdings information in order to assess the risks of the Fund's portfolio along with related performance attribution statistics. The lag time for such disclosures will vary. The Fund believes that these third parties have legitimate objectives in requesting such portfolio holdings information.

The Fund's policies and procedures provide that the Authorized Person may authorize disclosure of non-public portfolio holdings information to such parties at differing times and/or with different lag times. Prior to making any disclosure to a third party, the Authorized Person must determine that such disclosure serves a reasonable business purpose, is in the best interests of the Fund's shareholders and that to the extent conflicts between the interests of the Fund's shareholders and those of the Adviser, principal underwriter, or any affiliated person of the Fund exist, such conflicts are addressed. Portfolio holdings information may be disclosed no earlier than 10 days after each calendar quarter end to ratings agencies, consultants and other qualified financial professionals or individuals. The Trust's Chief Compliance Officer will regularly review these arrangements and will make periodic reports to the Board regarding disclosure pursuant to such arrangements.

With the exception of disclosures to rating and ranking organizations as described above, the Fund requires any third party receiving non-public holdings information to enter into a confidentiality agreement with the Adviser. The confidentiality agreement provides, among other things, that non-public portfolio holdings information will be kept confidential and that the recipient has a duty not to trade on the non-public information and will use such information solely to analyze and rank the Fund, or to perform due diligence and asset allocation, depending on the recipient of the information.

The Fund's policies and procedures prohibit any compensation or other consideration from being paid to or received by any party in connection with the disclosure of portfolio holdings information, including the Fund, the Adviser and its affiliates or recipients of the Fund's portfolio holdings information.

DESCRIPTION OF SHARES

The Declaration of Trust authorizes the issuance of an unlimited number of funds and shares of each fund. Each share of a fund represents an equal proportionate interest in that portfolio with each other share. Shares are entitled upon liquidation to a pro rata share in the net assets of the portfolio. Shareholders have no preemptive rights. The Declaration of Trust provides that the Trustees may create additional series or classes of shares. All consideration received by the Trust for shares of any funds and all assets in which such consideration is invested would belong to that fund and would be subject to the liabilities related thereto. Share certificates representing shares will not be issued. The Fund's shares, when issued, are fully paid and non-assessable.

SHAREHOLDER LIABILITY

The Trust is an entity of the type commonly known as a "Massachusetts business trust." Under Massachusetts law, shareholders of such a trust could, under certain circumstances, be held personally liable as partners for the obligations of the trust. Even if, however, the Trust were held to be a partnership, the possibility of the shareholders incurring financial loss for that reason appears remote because the Declaration of Trust contains an express disclaimer of shareholder liability for obligations of the Trust and requires that notice of such disclaimer be given in each agreement, obligation or instrument entered into or executed by or on behalf of the Trust or the Trustees, and because the Declaration of Trust provides for indemnification out of the Trust property for any shareholder held personally liable for the obligations of the Trust.

LIMITATION OF TRUSTEES' LIABILITY

The Declaration of Trust provides that a Trustee shall be liable only for his or her own willful defaults and, if reasonable care has been exercised in the selection of officers, agents, employees or investment advisers, shall not be liable for any neglect or wrongdoing of any such person. The Declaration of Trust also provides that the Trust will indemnify its Trustees and officers against liabilities and expenses incurred in connection with actual or threatened litigation in which they may be involved because of their offices with the Trust unless it is determined in the manner provided in the Declaration of Trust that they have not acted in good faith in the reasonable belief that their actions were in the best interests of the Trust. However, nothing in the Declaration of Trust shall protect or indemnify a Trustee against any liability for his or her willful misfeasance, bad faith, gross negligence or reckless disregard of his or her duties. Nothing contained in this section attempts to disclaim a Trustee's individual liability in any manner inconsistent with the federal securities laws.

PROXY VOTING

The Board has delegated responsibility for decisions regarding proxy voting for securities held by the Fund to the Adviser. The Adviser will vote such proxies in accordance with its proxy policies and procedures, which are included in Appendix B to this SAI.

The Trust is required to disclose annually the Fund's complete proxy voting record during the most recent 12-month period ended June 30 on Form N-PX. This voting record is available: (i) without charge, upon request, by calling 1-866-301-7212; and (ii) on the SEC's website at www.sec.gov.

CODES OF ETHICS

The Board, on behalf of the Trust, has adopted a Code of Ethics pursuant to Rule 17j-1 under the 1940 Act. In addition, the Adviser, the Administrator and the Distributor have adopted Codes of Ethics pursuant to Rule 17j-1 (each a "Code of Ethics" and together the "Codes of Ethics"). These Codes of Ethics apply to the personal investing activities of trustees, officers and certain employees ("Access Persons"). Rule 17j-1 and the Codes of Ethics are designed to prevent unlawful practices in connection with the purchase or sale of securities by Access Persons. Under each Code of Ethics, Access Persons are permitted to invest in securities, including securities that may be purchased or held by the Fund, but are required to report their personal securities transactions for monitoring purposes. In addition, certain Access Persons are required to obtain approval before investing in initial public offerings or private placements or are prohibited from making such investments. Copies of these Codes of Ethics are on file with the SEC, and are available to the public.

PRINCIPAL SHAREHOLDERS AND CONTROL PERSONS

As of February 13, 2017, the following persons were record owners (or to the knowledge of the Trust, beneficial owners) of 5% or more of the shares of the Fund. The Trust believes that most of the shares referred to below were held by the below persons in accounts for their fiduciary, agency or custodial customers. Persons beneficially owning more than 25% of the Fund's outstanding shares may be deemed to "control" the Fund within the meaning of the 1940 Act. Shareholders controlling the Fund may have a significant impact on any shareholder vote of the Fund.

APPENDIX A

DESCRIPTION OF RATINGS

Description of Ratings

The following descriptions of securities ratings have been published by Moody's Investors Services, Inc. ("Moody's"), Standard & Poor's ("S&P"), and Fitch Ratings ("Fitch"), respectively.

DESCRIPTION OF MOODY'S GLOBAL RATINGS

Ratings assigned on Moody's global long-term and short-term rating scales are forward-looking opinions of the relative credit risks of financial obligations issued by non-financial corporates, financial institutions, structured finance vehicles, project finance vehicles, and public sector entities. Long-term ratings are assigned to issuers or obligations with an original maturity of one year or more and reflect both on the likelihood of a default on contractually promised payments and the expected financial loss suffered in the event of default. Short-term ratings are assigned to obligations with an original maturity of thirteen months or less and reflect both on the likelihood of a default on contractually promised payments and the expected financial loss suffered in the event of default.

Description of Moody's Global Long-Term Ratings

Aaa Obligations rated Aaa are judged to be of the highest quality, subject to the lowest level of credit risk.

Aa Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

A Obligations rated A are judged to be upper-medium grade and are subject to low credit risk.

Baa Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

Ba Obligations rated Ba are judged to be speculative and are subject to substantial credit risk.

B Obligations rated B are considered speculative and are subject to high credit risk.

Caa Obligations rated Caa are judged to be speculative of poor standing and are subject to very high credit risk.

Ca Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

C Obligations rated C are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Note: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Hybrid Indicator (hyb)

The hybrid indicator (hyb) is appended to all ratings of hybrid securities issued by banks, insurers, finance companies, and securities firms. By their terms, hybrid securities allow for the omission of scheduled dividends, interest, or principal payments, which can potentially result in impairment if such an omission occurs. Hybrid securities may also be subject to contractually allowable write-downs of principal that could result in impairment. Together with the hybrid indicator, the long-term obligation rating assigned to a hybrid security is an expression of the relative credit risk associated with that security.

Description of Moody's Global Short-Term Ratings

P-1 Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

P-2 Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

P-3 Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to repay short-term obligations.

NP Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

Description of Moody's U.S. Municipal Short-Term Obligation Ratings

The Municipal Investment Grade ("MIG") scale is used to rate U.S. municipal bond anticipation notes of up to three years maturity. Municipal notes rated on the MIG scale may be secured by either pledged revenues or proceeds of a take-out financing received prior to note maturity. MIG ratings expire at the maturity of the obligation, and the issuer's long-term rating is only one consideration in assigning the MIG rating. MIG ratings are divided into three levels—MIG 1 through MIG 3—while speculative grade short-term obligations are designated SG.

Moody's U.S. municipal short-term obligation ratings are as follows:

MIG 1 This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

MIG 2 This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

MIG 3 This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

SG This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

Description of Moody's Demand Obligation Ratings

In the case of variable rate demand obligations ("VRDOs"), a two-component rating is assigned: a long or short-term debt rating and a demand obligation rating. The first element represents Moody's evaluation of risk associated with scheduled principal and interest payments. The second element represents Moody's evaluation of risk associated with the ability to receive purchase price upon demand ("demand feature"). The second element uses a rating from a variation of the MIG scale called the Variable Municipal Investment Grade ("VMIG") scale.

Moody's demand obligation ratings are as follows:

VMIG 1 This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

VMIG 2 This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

VMIG 3 This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

SG This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have an investment grade short-term rating or may lack the structural and/or legal protections necessary to ensure the timely payment of purchase price upon demand.

DESCRIPTION OF S&P'S ISSUE CREDIT RATINGS

An S&P issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The opinion reflects S&P's view of the obligor's capacity and willingness to meet its financial commitments as they come due, and may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default.

Issue credit ratings can be either long-term or short-term. Short-term ratings are generally assigned to those obligations considered short-term in the relevant market. In the U.S., for example, that means obligations with an original maturity of no more than 365 days—including commercial paper. Short-term ratings are also used to indicate the creditworthiness of an obligor with respect to put features on long-term obligations. Medium-term notes are assigned long-term ratings.

Issue credit ratings are based, in varying degrees, on S&P's analysis of the following considerations:

- The likelihood of payment—the capacity and willingness of the obligor to meet its financial commitment on a financial obligation in accordance with the terms of the obligation;
- The nature of and provisions of the financial obligation; and the promise S&P imputes; and
- The protection afforded by, and relative position of, the obligation in the event of bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

Issue ratings are an assessment of default risk, but may incorporate an assessment of relative seniority or ultimate recovery in the event of default. Junior obligations are typically rated lower than senior obligations, to reflect the lower priority in bankruptcy. (Such differentiation may apply when an entity has both senior and subordinated obligations, secured and unsecured obligations, or operating company and holding company obligations.)

Description of S&P's Long-Term Issue Credit Ratings*

AAA An obligation rated 'AAA' has the highest rating assigned by S&P. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

AA An obligation rated 'AA' differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

A An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

BBB An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

BB; B; CCC; CC; and C Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

B An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

CCC An obligation rated ‘CCC’ is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC An obligation rated ‘CC’ is currently highly vulnerable to nonpayment. The ‘CC’ rating is used when a default has not yet occurred, but S&P expects default to be a virtual certainty, regardless of the anticipated time to default.

C An obligation rated ‘C’ is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared to obligations that are rated higher.

D An obligation rated ‘D’ is in default or in breach of an imputed promise. For non-hybrid capital instruments, the ‘D’ rating category is used when payments on an obligation are not made on the date due, unless S&P believes that such payments will be made within five business days in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The ‘D’ rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation’s rating is lowered to ‘D’ if it is subject to a distressed exchange offer.

NR This indicates that no rating has been requested, or that there is insufficient information on which to base a rating, or that S&P does not rate a particular obligation as a matter of policy.

*The ratings from ‘AA’ to ‘CCC’ may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

Description of S&P’s Short-Term Issue Credit Ratings

A-1 A short-term obligation rated ‘A-1’ is rated in the highest category by S&P. The obligor’s capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor’s capacity to meet its financial commitment on these obligations is extremely strong.

A-2 A short-term obligation rated ‘A-2’ is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor’s capacity to meet its financial commitment on the obligation is satisfactory.

A-3 A short-term obligation rated ‘A-3’ exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

B A short-term obligation rated ‘B’ is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties which could lead to the obligor’s inadequate capacity to meet its financial commitments.

C A short-term obligation rated ‘C’ is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.

D A short-term obligation rated ‘D’ is in default or in breach of an imputed promise. For non-hybrid capital instruments, the ‘D’ rating category is used when payments on an obligation are not made on the date due, unless S&P believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The ‘D’ rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation’s rating is lowered to ‘D’ if it is subject to a distressed exchange offer.

Description of S&P’s Municipal Short-Term Note Ratings

An S&P U.S. municipal note rating reflects S&P’s opinion about the liquidity factors and market access risks unique to the notes. Notes due in three years or less will likely receive a note rating. Notes with an original maturity of more than three years will most likely receive a long-term debt rating. In determining which type of rating, if any, to assign, S&P’s analysis will review the following considerations:

- Amortization schedule—the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and
- Source of payment—the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

S&P’s municipal short-term note ratings are as follows:

SP-1 Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

SP-2 Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

SP-3 Speculative capacity to pay principal and interest.

DESCRIPTION OF FITCH’S CREDIT RATINGS

Fitch’s credit ratings provide an opinion on the relative ability of an entity to meet financial commitments, such as interest, preferred dividends, repayment of principal, insurance claims or counterparty obligations. Credit ratings are used by investors as indications of the likelihood of receiving the money owed to them in accordance with the terms on which they invested.

The terms “investment grade” and “speculative grade” have established themselves over time as shorthand to describe the categories ‘AAA’ to ‘BBB’ (investment grade) and ‘BB’ to ‘D’ (speculative grade). The terms “investment grade” and “speculative grade” are market conventions, and do not imply any recommendation or endorsement of a specific security for investment purposes. “Investment grade” categories indicate relatively low to moderate credit risk, while ratings in the “speculative” categories either signal a higher level of credit risk or that a default has already occurred.

Fitch’s credit ratings do not directly address any risk other than credit risk. In particular, ratings do not deal with the risk of a market value loss on a rated security due to changes in interest rates, liquidity and other market considerations. However, in terms of payment obligation on the rated liability, market risk may be considered to the extent that it influences the *ability* of an issuer to pay upon a commitment. Ratings nonetheless do not reflect market risk to the extent that they influence the size or other conditionality of the *obligation* to pay upon a commitment (for example, in the case of index-linked bonds).

In the default components of ratings assigned to individual obligations or instruments, the agency typically rates to the likelihood of non-payment or default in accordance with the terms of that instrument’s documentation. In limited cases, Fitch may include additional considerations (i.e. rate to a higher or lower standard than that implied in the obligation’s documentation). In such cases, the agency will make clear the assumptions underlying the agency’s opinion in the accompanying rating commentary.

A designation of Not Rated or NR is used to denote securities not rated by Fitch where Fitch has rated some, but not all, securities comprising an issuance capital structure.

Description of Fitch’s Long-Term Corporate Finance Obligations Ratings

AAA Highest credit quality. ‘AAA’ ratings denote the lowest expectation of credit risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

AA Very high credit quality. ‘AA’ ratings denote expectations of very low credit risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

A High credit quality. ‘A’ ratings denote expectations of low credit risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

BBB Good credit quality. ‘BBB’ ratings indicate that expectations of credit risk are currently low. The capacity for payment of financial commitments is considered adequate but adverse business or economic conditions are more likely to impair this capacity.

BB Speculative. ‘BB’ ratings indicate an elevated vulnerability to credit risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial alternatives may be available to allow financial commitments to be met.

B Highly speculative. ‘B’ ratings indicate that material credit risk is present.

CCC Substantial credit risk. ‘CCC’ ratings indicate that substantial credit risk is present.

CC Very high levels of credit risk. ‘CC’ ratings indicate very high levels of credit risk.

C Exceptionally high levels of credit risk. ‘C’ ratings indicate exceptionally high levels of credit risk.

Defaulted obligations typically are not assigned ‘RD’ or ‘D’ ratings, but are instead rated in the ‘B’ to ‘C’ rating categories, depending upon their recovery prospects and other relevant characteristics. This approach better aligns obligations that have comparable overall expected loss but varying vulnerability to default and loss.

Note: The modifiers “+” or “-” may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the ‘AAA’ obligation rating category, or to corporate finance obligation ratings in the categories below ‘CCC’.

The subscript ‘emr’ is appended to a rating to denote embedded market risk which is beyond the scope of the rating. The designation is intended to make clear that the rating solely addresses the counterparty risk of the issuing bank. It is not meant to indicate any limitation in the analysis of the counterparty risk, which in all other respects follows published Fitch criteria for analyzing the issuing financial institution. Fitch does not rate these instruments where the principal is to any degree subject to market risk.

Description of Fitch’s Short-Term Ratings

A short-term issuer or obligation rating is based in all cases on the short-term vulnerability to default of the rated entity or security stream and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-Term Ratings are assigned to obligations whose initial maturity is viewed as short term based on market convention. Typically, this means up to 13 months for corporate, sovereign, and structured obligations, and up to 36 months for obligations in U.S. public finance markets.

Fitch’s short-term ratings are as follows:

F1 Highest short-term credit quality. Indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added “+” to denote any exceptionally strong credit feature.

F2 Good short-term credit quality. Good intrinsic capacity for timely payment of financial commitments.

F3 Fair short-term credit quality. The intrinsic capacity for timely payment of financial commitments is adequate.

B Speculative short-term credit quality. Minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

C High short-term default risk. Default is a real possibility.

RD Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically applicable to entity ratings only.

D Default. Indicates a broad-based default event for an entity, or the default of a short-term obligation.

Haverford Financial Services, Inc.

Proxy Voting Policy – 2017

Intention of the Proxy Voting Policy

Haverford Financial Services, Inc. (HFS) considers the power to vote on proposals presented to shareholders through the proxy solicitation process to be an integral part of an investment manager's responsibility. HFS recognizes that certain proposals, if implemented, may have a substantial impact on the market valuation of portfolio securities and that in such situations the right to vote is considered an asset. The Proxy Voting Policy is designed to ensure that:

1. Proxies for which HFS has ultimate voting authority are voted consistently and solely in the best economic interests of the beneficiaries of these equity investments, and not in the interests of HFS or any associated parties other than the clients.
2. Any real or perceived material conflicts that may arise between the interests of HFS or any of its associate parties and those of the clients are properly addressed and resolved.

Third Party Proxy Voting Services

To assist the company in voting proxies, HFS has retained Egan-Jones Proxy Services ("Egan-Jones"). Egan-Jones is an independent adviser that specializes in providing a variety of fiduciary-level proxy-related services to institutional investment managers, plan sponsors, custodians, consultants, and other institutional investors. The services provided to HFS by Egan-Jones include in-depth research, voting recommendations (although HFS is not obligated to follow such recommendations), vote execution, and record keeping. Egan-Jones also assists HFS in its reporting and record keeping relating to proxy voting.

Proxy Voting Guidelines

HFS has adopted the following specific voting guidelines:

1. HFS will vote client proxies in line with the recommendations made by Egan-Jones, except in circumstances detailed in (2) of this section. Egan-Jones' recommendations focus on voting proxies in the best economic interest of shareholders, and as such align well with the goals of HFS' clients. Egan-Jones' specific proxy voting policies are available upon request.
2. HFS' Investment Selection Committee reserves the right to vote a proxy contrary to Egan-Jones' recommendation with a majority vote. Issues that can trigger a review by the committee for the purpose of voting against Egan-Jones include, but are not limited to:
 - a. Mergers and acquisitions
 - b. Spin-offs, split-offs, or IPOs
 - c. Significant alterations of the capital structure of the company
 - d. Other significant corporate actions
 - e. Employee compensation and benefits
3. Should any real or perceived material conflicts arise between the interests of HFS or any of its associated parties and those of its clients, HFS' Investment Selection Committee will forego its right to vote a proxy contrary to Egan-Jones' recommendation.
